If you are not sure of the correct installation of any part of the quick start guide, please download the complete installation manual available at www.autopageusa.com. This quick start guide is a brief summary for professional installers that are familiar with the installation and operation of the Autopage system. Please visit all of your customers to ensure proper operation of the vehicle system following this guide.

For additional technical support, please call 800-434-4343, and visit our website www.autopageusa.com through following from 8:00 to 5:00 Pacific Standard Time.

The Autopage Starter with Autopage Entry System has been designed to be installed on Autopage systems with an Autopage transmitter (DS-434).

1. Mount the Starter on the vehicle using the provided mounting hardware.

2. The system must be installed and tested through a safety switch or it will not start in any forward or reverse gear.

Some Autopage transmitter vehicles may have other DS-434 vehicles with a starter system that has a mechanical-type gear safety switch instead of electrical safety switch. The mechanical-type gear does not interrupt the starter circuit when the transmission is in any gear and does not allow the 100% level of safety required for remote starting operation. Therefore, our system should never be installed on any vehicle that uses a mechanical-type gear safety switch.

Once you install the system, you must verify that the vehicle will not start in any forward or reverse gear regardless of the type of vehicle.

3. Mount the system on the vehicle using the provided mounting hardware.

4. Do not install any component near the Starter, gear point or wiring harness.

Some vehicles have a factory installed transponder immobilizer system that can severely compromise the installation. There is a possibility that the system cannot be installed on some immobilizer-equipped vehicles.

Many vehicles have an ABS or air system. Some vehicles can and do not provide any level of the ABS system.

5. Disconnect the air battery before beginning work on the system.

Check battery grounds before driving any vehicle. Ensure that no wiring harness or other components are located between the battery that would otherwise be damaged.

6. Do not use conventional jump box, battery or any other power source. Use a proper jump with properly connected terminals into the starter system and may result in loose wiring or increased operation. The suggested following of connection points.

7. Install the wiring neatly under carpets or under seat to prevent possible damage to wires.
