David as Reader Pyper, 2021-08-30 Starting from David's response to Nathan's parable in 2 Sam 12 this book employs an original synthesis of literary linguistic and psychoanalytic theory to explore the impact of the biblical text on its readers. It draws parallels between the relationships of speaker to utterance, texts to reader and father to son in arguing for an underlying anxiety of utterance as the source of textual power. Biblical scholars will find stimulating readings of many problematic narratives as well as a detailed investigation of the poetics of the biblical oath. The theoretical account of the role of characters in mediating the interaction between text and reader will be of interest to all students of literature. Its provocative insights into the relationship between God, language, masculinity and authority raise important questions for theology and gender studies.

Reader's Guide to the Social Sciences Jonathan Michie, 2014-02-03 This 2 volume work includes approximately 1 200 entries in A-Z order critically reviewing the literature on specific topics from abortion to world systems theory. In addition nine major entries cover each of the major disciplines: political economy, management and business, human geography, politics, sociology, law, psychology, organizational behavior and the history and development of the social sciences in a broader sense.

On Reasoning and Argument David Hitchcock, 2017-04-06 This book brings together in one place David Hitchcock's most significant published articles on reasoning and argument. In seven new chapters he updates his thinking in the light of subsequent scholarship. Collectively the papers articulate a distinctive position in the philosophy of argumentation. Among other things the author develops an account of material consequence that permits evaluation of inferences without problematic postulation of unstated premises; updates his recursive definition of argument that accommodates chaining and embedding of arguments and allows any type of illocutionary act to be a conclusion; advances a general theory of relevance; provides comprehensive frameworks for evaluating inferences in reasoning by analogy, means-end reasoning and appeals to considerations or criteria; argues that none of the forms of arguing ad hominem is a fallacy; describes proven methods of teaching critical thinking effectively.

Nietzsche's System John Richardson, 2002-05-23 This book argues against recent interpretations that Nietzsche does in fact have a metaphysical system but that this is to his credit. Rather than renouncing philosophy's traditional project he still aspires to find and state essential truths both descriptive and evaluative about us and the world. These basic thoughts organize and inform everything he writes; by examining them closely we can find the larger structure and unifying sense of his strikingly diverse views. With rigor and conceptual specificity Richardson examines the will to power ontology and maps the values that emerge from it. He also considers the significance of Nietzsche's famous break with Plato, replacing the concept of being with that of becoming. By its conservative method this book tries to do better justice to the truly radical force of Nietzsche's ideas, to demonstrate more exactly their novelty and interest.

Historicizing Race Marius Turda, Maria Sophia Quine, 2018-02-22 The idea of race may be outdated as many commentators and scholars working in a broad range of different fields in the sciences and humanities have argued over many years Nevertheless it remains one of the most persistent forms of human classification Theories of race primitivism the idea that there is a natural racial hierarchy and ranking order of inferior and superior races race biologism the belief that people can be classified by genetic features which are shared by members of racial groups and race essentialism the notion that races can be defined by scientifically identifiable and verifiable cultural and physical characteristics are deeply embedded in modern history culture and politics *Historicizing Race* offers a new understanding of this reality by exploring the interconnectedness of scientific cultural and political strands of racial thought in Europe and elsewhere It re conceptualises the idea of race by unearthing various historical traditions that continue to inform not only current debates about individual and collective identities but also national and international politics In a concise format accessible to students and scholars alike the authors draw out some of the reasons why race centred thinking has in recent years re emerged in such shocking and explicit form in current populist xenophobic and anti immigration movements

The Real Economy Jonathan Levy, 2025-02-25 A provocative new theory of the economy its history and its politics that better unites history and economics What is the economy really Is it a market sector a general equilibrium or the gross domestic product Economics today has become so preoccupied with methods that economists risk losing sight of the economy itself Meanwhile other disciplines although often intent on criticizing the methods of economics have failed to articulate an alternative vision of the economy Before the ascent of postwar neoclassical economics fierce debates raged as many different visions of the economy circulated and competed with one another In *The Real Economy* Jonathan Levy returns to the spirit of this earlier era which in all its contentiousness gave birth to the discipline of economics Drawing inspiration particularly from Thorstein Veblen and John Maynard Keynes Levy proposes a theory of the economy that is open to rich empirical and historical scrutiny covering topics that include the emergence of capitalism the notion of radical uncertainty the meaning of demand the primal desire for money the history of corporations and contemporary globalization Writing for anyone interested in the study of the economy Levy provides an invaluable provocation for a broader debate in the social sciences and humanities concerning what the economy is
