A New Scramble for Africa? Roger Southall, Henning Melber, 2009 Raises significant general questions relating to the nature of global competition between the US and China the centrality of the struggle for oil and minerals and resulting militarisation the international battle to capture Africa's markets and the marginalisation of African capitalism *The New Scramble for Africa* Pádraig R. Carmody, 2017-01-03 Once marginalized in the world economy Africa today is a major global supplier of crucial raw materials like oil uranium and coltan China's part in this story has loomed particularly large in recent years and the American military footprint on the continent has also expanded But a new scramble for resources markets and territory is now taking place in Africa involving not just state but non state actors including Islamic fundamentalist and other rebel groups The second edition of Pádraig Carmody's popular book explores the dynamics of the new scramble for African resources markets and territory and the impact of current investment and competition on people the environment and political and economic development on the continent Fully revised and updated throughout its chapters explore old and new economic power interests in Africa oil minerals timber biofuels land food and fisheries and the nature and impacts of Asian and South African investment in manufacturing and other sectors The *New Scramble for Africa* will be essential reading for students of African studies international relations and resource politics as well as anyone interested in current affairs

The New Scramble for Africa Pádraig Carmody, 2013-04-16 Once marginalized in the world economy the past decade has seen Africa emerge as a major global supplier of crucial raw materials like oil uranium and coltan With its share of world trade and investment now rising and the availability of natural resources falling the continent finds itself at the centre of a battle to gain access to and control of its valuable natural assets China's role in Africa has loomed particularly large in recent years but there is now a new scramble taking place involving a wider range of established and emerging economic powers from the EU and US to Japan Brazil and Russia This book explores the nature of resource and market competition in Africa and the strategies adopted by the different actors involved be they world powers or small companies Focusing on key commodities the book examines the dynamics of the new scramble and the impact of current investment and competition on people the environment and political and economic development on the continent New theories particularly the idea of Chinese flexigemony are developed to explain how resources and markets are accessed While resource access is often the primary motive for increased engagement the continent also offers a growing market for low priced goods from Asia and Asian owned companies Individual chapters explore old and new economic power interests in Africa oil minerals timber biofuels food and fisheries and the nature and impacts of Asian investment in manufacturing and other sectors The *New Scramble for Africa* will be essential reading for students of African studies international relations and resource politics as well as anyone interested in current affairs *India in Africa: Changing Geographies of Power* Emma Mawdsley, Gerard

McCann,2011-09-15 In one of the first analyses of contemporary IndianAfrican relations this detailed book draws upon a collection of case studies that explore interrelated topics such as trade investment development aid civil society relations security and geopolitics While China s relationship to Africa has been thoroughly examined knowledge and analysis of India s role in Africa has until now been limited This book fills the gap and compares and contrasts India to China s role as a rising global power in the African continent

Mining Africa Warikandwa, Tapiwa V.,2017-05-01 This book is a pacesetter in matters of mining and the environment in Africa from multidisciplinary and spatio temporal perspectives The book approaches mining from the perspectives of law politics archaeology anthropology African studies geography human ecology sociology history economics and development It interrogates mining and environment from the perspectives of customary law as well as from the perspectives of Euro modern laws In this sense the book straddles precolonial colonial and postcolonial mining and environmental perspectives In all this it maintains a Pan Africanist perspective that also speaks to contemporary debates on African Renaissance and to the unity of Africa From scrutinising the lived realities of African miners who are often insensitively and unjustly addressed as illegal miners the book also interrogates transnational mining corporations matters of corporate social responsibility as well as matters of tax evasions by transnational corporations whose commitment to accountability to African governments is questioned With both theoretical chapters and chapter based on empirical studies on mining and the environment across the African continent the book provides a much needed holistic one stop shop for scholars activists researchers and policy makers who need a comprehensive treatise on African mining and the environment The book comes at the right time when matters of African mining and environment are increasingly coming to the fore in the light of discourses about the new 21st century scramble for African resources in which big transnational corporations and nations are jostling to suck Africa dry in their race to control planetary resources It is a book that speaks to contemporary broader issues of de coloniality and transformation of African minds and African environmental resources

Spaces of Responsibility Diana Ayeh,2021-09-20 Spaces of Responsibility explores the role of ethics in re ordering extractive relations under the global condition Through an empirical investigation of actors places and ideas in and around Burkina Faso s industrial gold mining sector this volume carries out an anti essentialist yet critical examination offering new insights into global mining capitalism Corporate concession making practices the implementation of national mining legislation and civil society interventions in mining areas all contribute in different ways to the dialectics of the global Accordingly the ongoing territorialization of mining investment often has considerable impacts on the well being of populations in the Global South At the same time multinational corporations today cannot completely distance or isolate themselves from the political economic and social contexts they are interacting in and with Drawing on theoretical debates about the links between resource extraction and socio economic development multi scalar negotiations of ethics in mining governance are ethnographically retraced In terms of gains and benefits these negotiations manifest themselves spatially providing access for some actors

while excluding others

Handbook of Africa's International Relations Tim Murithi, 2013-09-05 Africa's international relations have often been defined and oriented by the dominant international and geopolitical agendas of the day. In the aftermath of colonialism the Cold War became a dominant paradigm that defined the nature of the continent's relationship with the rest of the world. The contemporary forces of globalization are now exerting an undue influence and impact upon Africa's international relations. Increasingly the African continent is emerging as a vocal and in some respects an influential actor in international relations. There is a paucity of analysis and research on this emerging trend. This timely book proposes to fill this analytical gap by engaging with a wide range of issues with chapters written by experts on a variety of themes. The emerging political prominence of the African continent on the world stage is predicated on an evolving internal process of continental integration. In particular there are normative and policy efforts to revive the spirit of Pan Africanism. The 21st century is witnessing the evolution of Pan Africanism notably through the constitution and establishment of the African Union (AU). Given the fact that there is a dearth of analysis on this phenomenon this volume will also interrogate the notion of Pan Africanism through various lenses notably peace and security development the environment and trade. The volume will also engage with the emerging role of the AU as an international actor e.g. with regard to its role in the reform of the United Nations Security Council climate change the International Criminal Court (ICC) the treaty establishing Africa as a nuclear free zone Internally Displaced Persons the Millennium Development Goals (MDGs) international trade the environment public health issues security and development issues. This book will assess how the AU's role as an international actor is complicated by the difficulty of promoting consensus among African states and then maintaining that consensus in the face of often divergent national interests. This book will in part assess the role of the AU in articulating collective and joint policies and in making interventions in international decision and policy making circles. The Handbook will also assess the role of African social movements and their relationship with global actors. The role of African citizens in ameliorating their own conditions is often underplayed in the international relations discourse and this volume will seek to redress this oversight. Throughout the book the various chapters will also assess the role that these citizen linkages have contributed towards continental integration and in confronting the challenges of globalization.

The Rise of the BRICS in Africa Pádraig Carmody, 2013-09-12 A little over a decade ago Africa was being spoken of in the media as the lost or hopeless continent. Now it has some of the fastest growing economies in the world largely because of the impact of the BRICS (Brazil Russia India China and South Africa). In this first book to be written about the BRICS as a collective phenomenon Pádraig Carmody reveals how their engagements with Africa both individually and collectively are often contradictory generating new inequalities and potential for development. Crucially Carmody shows how the geopolitics of the BRICS countries' involvement in Africa is impacted by and impacts upon their international relations more generally and how the emergence of these economies has begun to alter the very nature of globalization which is no longer purely a Western led project. This is a path breaking

examination of Africa's changing role in the world Handbook of Land and Water Grabs in Africa John Anthony Allan, 2013
Four other themes will be addressed: politics, economics, the environment, and the history of land investments in sub-Saharan Africa
