**Patchwork of World History in Texas High Schools** Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States

### **The Material of World History**

Tina Mai Chen, David S. Churchill, 2015-03-27. This volume considers the confluence of World History and historical materialism with the following guiding question in mind: given developments in the field of historical materialism concerned with the intersection of race, gender, labour, and class, why is it that within the field of World History, historical materialism has been marginalized precisely as World History orients toward transnational socio-cultural phenomenon, micro studies, or global histories of networks? Answering this question requires thinking in an interrelated manner about both the development of World History as a discipline and the place of economic determinism in historical materialism. This book takes the position that historical materialism, as applied to the field of World History, needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to the marginalization of materialist cultural analysis in studies of global capitalism. At the same time, World History needs to be more self-critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural, social, and intellectual dimensions of global processes.

### *21st-Century Narratives of World History*

R. Charles Weller, 2017-11-06. This book makes a unique and timely contribution to world/global historical studies and related fields. It places essential world historical frameworks by top scholars in the field today in clear, direct relation to and in conversation with one another, offering them opportunity to enrich, elucidate, and at times challenge one another. It thereby aims to: 1) offer world historians opportunity to critically reflect upon and refine their essential interpretational frameworks; 2) facilitate more effective and nuanced teaching and learning in and beyond the classroom; 3) provide accessible world historical contexts for specialized areas of historical as well as other fields of research in the humanities, social sciences, and sciences; and 4) promote comparative historiographical critique which helps identify continuing research questions for the field of world history in particular as well as to further global peace and dialogue in relation to varying views of our ever increasingly interconnected, interdependent, multicultural, and globalized world and its shared though diverse and sometimes contested history.
