1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

Concerning the calcium phosphate example, the literature provides a number of strategies either to augment or to suppress the precipitation of the calcium phosphate salt. Any strategy involving both one or two 100-micromolar phosphate ions will result in a total of 100% calcium phosphate. The second, reducing both the calcium concentration and increasing the amount of 100-micromolar phosphate.

- 1) Structure determines function and vice versa; structure is a consequence and function is a consequence and compounds can have different functions depending on the functional groups and functional centers.
- 2) Structure also determines reactivity; the electron-donating and electron-withdrawing groups can affect the reactivity of the functional groups.
- 3) Chemical and physical properties of functional groups are determined by the structure of the functional groups.
- 4) Chemical reactivity determines the structure of the functional groups; the structure of the functional groups determines the reactivity of the functional groups.
- 5) Chemical and physical properties of functional groups are determined by the structure of the functional groups.
