A New Climate For Theology God The World And Global Warming:

A New Climate for Theology Sallie McFague, 2008-04-03 Climate change promises monumental changes to human and other planetary life in the next generations Yet government business and individuals have been largely in denial of the possibility that global warming may put our species on the road to extinction Further says Sallie McFague we have failed to see the real root of our behavioral troubles in an economic model that actually reflects distorted religious views of the person At its heart she maintains global warming occurs because we lack an appropriate understanding of ourselves as inextricably bound to the planet and its systems A New Climate for Theology not only traces the distorted notion of unlimited desire that fuels our market system it also paints an alternative idea of what being human means and what a just and sustainable economy might mean Convincing specific and wise McFague argues for an alternative economic order and for our relational identity as part of an unfolding universe that expresses divine love and human freedom It is a view that can inspire real change an altered lifestyle and a form of Christian discipleship and desire appropriate to who we really are **Main**
