A New Humanism A New Humanism:

Mircea Eliade's Vision for a New Humanism David Cave,1993-01-28 The influential scholar of religion Mircea Eliade envisioned a spiritually destitute modern culture coming into renewed meaning through the recovery of archetypal myths and symbols Eliade defined this restoration of meaning as a new humanism of existential meaning and cultural religious unity Through a biographical exegesis of Eliade's life and writings from his earliest years in Romania to his final ones as professor of the history of religions at the University of Chicago Cave sets forward a structural description of what this new humanism might have meant for Eliade and what it signifies for modern culture Cave concludes by endorsing Eliade's radically pluralistic vision which he argues offers a key to the revitalization of our demythologized and material culture This study repositions previous Eliadean studies and places the new humanism as the paradigm in relation to which future readings of Eliade should be evaluated *Toward a New Humanism* Samuel Ramos,2025-09-03 Written in 1940 and available here for the first time ever in English Samuel Ramos *Toward a New Humanism* is a prescient discussion of humanism technology mortality and the tensions between the national and the universal In addition to Sanchez's thoughtful introduction his superb translation of Ramos's text and the informative editorial notes running throughout this volume is further enriched by the inclusion of translations of other earlier essays written by Ramos and other influential philosophers from the period on related topics as well as translations of assessments of Ramos's new humanism by other leading philosophers in mid century Mexico More than eighty five years after its original publication and in this era of renewed global conflicts Ramos's call for a profound rethinking and reshaping of modern culture and society is as timely as when it was written and Sanchez is to be commended for making this important text available for a new generation of readers Manuel Vargas and Clinton Tolley Mexican Philosophy Lab UC San Diego **New Humanism** Manabendra Nath Roy,1961 *AI, Consciousness and The New Humanism* Sangeetha Menon,Saurabh Todariya,Tilak Agerwala,2024-03-20 This edited volume presents perspectives from computer science information theory neuroscience and brain imaging aesthetics social sciences psychiatry and philosophy to answer frontier questions related to artificial intelligence and human experience Can a machine think believe aspire and be purposeful as a human What is the place in the machine world for hope meaning and transformative enlightenment that inspires human existence How or are the minds of machines different from that of humans and other species These questions are responded to along with questions in the intersection of health intelligence and the brain It highlights the place of consciousness by attempting to respond to questions with the help of fundamental reflections on human existence its life purposes and machine intelligence The volume is a must read for interdisciplinary and multidisciplinary researchers in humanities and social sciences and philosophy of science who wish to understand the future of AI and society *Towards a New Literary Humanism* A. Mousley,2011-02-08 Literature cultivates deep selves for whom books matter because they take over from religion fundamental questions about the meaning of existence This volume

embraces and questions this perspective whilst also developing a new humanist critical vocabulary which specifies and therefore opens to debate the human significance of literature **New Literature in Chinese** Zhu Shoutong,2017-03-07

This book systematically discusses the academic connotations of the concept of Modern Chinese Literature as well as its basic categories The discipline founded upon this concept is influential both in China and throughout the world and scholars engaged in teaching and research in this field number around ten thousand The discipline was originally established in haste in an abnormal academic environment and with the passage of time such derivative disciplines as Contemporary Chinese Literature 20th Century Chinese Literature the Literature of Taiwan Hong Kong and Macau and World Chinese Literature have appeared This book argues that these fields should be united in the area of New Literature in Chinese because they have a shared language culture and tradition In today s multi polar world where Chinese literature is so diversified such an approach is obviously helpful **Race and Racism in Continental Philosophy** Robert Bernasconi,2003-06-18

The 15 original essays in *Race and Racism in Continental Philosophy* explore the resources that continental philosophy brings to debates about contemporary race theory and investigate the racism of some of Europe s most important thinkers Attention is devoted to the influence of the work of W E B Du Bois Jean Paul Sartre Richard Wright and Frantz Fanon Questions about race in European philosophy especially in the work of Nietzsche Heidegger L vi Strauss and Arendt are also considered This volume provides an indispensable critical introduction to new perspectives on thinking about race and racism

Encyclopaedia of Eminent Thinkers Kuduva Swamy Bharathi,1998 **The History of Science and the New**

Humanism George Sarton,1937 *The Battle of the Classics* Eric Adler,2020-09-04 These are troubling days for the humanities In response a recent proliferation of works defending the humanities has emerged But taken together what are these works really saying and how persuasive do they prove *The Battle of the Classics* demonstrates the crucial downsides of contemporary apologetics for the humanities and presents in its place a historically informed case for a different approach to rescuing the humanistic disciplines in higher education It reopens the passionate debates about the classics that took place in late nineteenth and early twentieth century America as a springboard for crafting a novel foundation for the humanistic tradition Eric Adler demonstrates that current defenses of the humanities rely on the humanistic disciplines as inculcators of certain poorly defined skills such as critical thinking It criticizes this conventional approach contending that humanists cannot hope to save their disciplines without arguing in favor of particular humanities content As the uninspired defenses of the classical humanities in the late nineteenth century prove instrumental apologetics are bound to fail All the same the book shows that proponents of the Great Books favor a curriculum that is too intellectually narrow for the twenty first century *The Battle of the Classics* thus lays out a substance based approach to undergraduate education that will revive the humanities even as it steers clear of overreliance on the Western canon The book envisions a global humanities based on the examination of masterworks from manifold cultures as the heart of an intellectually and morally sound education
