of coma Chapter 9 examines the long term outcomes of coma including the minimally conscious state and the persistent vegetative state and how they can be distinguished and their implications for eventual useful recovery Chapter 10 reviews the topic of brain death and the standards for examination of a patient that are required to make the determination of brain death The final chapter 11 is by J J Fins a medical ethicist who was invited by the other authors to write an essay on the ethics of diagnosis and treatment of patients who by definition have no way to approve of or communicate about their wishes While providing detailed background for neurological and neurosurgical specialists the practical nature of the material in this book has found its greatest use among Internists Emergency Medicine and Intensive Care specialists who deal with comatose patients frequently but who may not have had extensive neurological training **Health and Wellness** , Health and Wellness Gordon Edlin,2014
