System of Universal Geography Popular and Scientific The New World In the preparation of this volume it has been a leading
object to dwell at length on those parts of the globe slightly noticed in the original work but which the progress of events has
brought and 18 bringing more conspicuously into notice Another object has been to furnish a more full account of those
countries in which as the seats of the most advanced civilization and the centres of movement the reader would naturally feel
the greatest interest The Introduction includes much valuable scientific information bearing on the subject of physical
geography In the body of the work an account is given of the rapidly growing provinces of British North America more full
and based on more recent information than is to be found elsewhere Due attention has also been paid to the rising British
colonies of Australia A laigo space is devoted to Bumpé and especially to the British Empire and the country in which next to
his own the reader would naturally feel the deepest interest The articles on the United States besides giving the results of the
recent geographical explorations of the western portions of our territory both the old and that more recently acquired
embody the most important statistical returns of the census of 1850 It will be observed that the two parts the one relating to
the Old World and the other to the New World are paged separately and that each has a separate Index About the Publisher
