Research Methods for Students, Academics and Professionals Kirsty Williamson, 2002-07-01 Research is such an important subject for information professionals that there will always be a need for effective guides to it. Research skills are a prerequisite for those who want to work successfully in information environments: an essential set of tools which enable information workers to become information professionals. This book focuses on producing critical consumers of research. It also goes some way towards producing researchers in the fields of information management and systems. The first edition of this book was enthusiastically received by researchers, students and information professionals in Australia and beyond. Archives and it has a multi-disciplinary focus with its authors being drawn from information management, librarianship, archives and recordkeeping and information systems. The numerous examples throughout the book are drawn from these multiple disciplines. Its Introduction noted that 'In research terms the content has been refereed and found to be authoritative'. To this can be added the many satisfied users of the first edition. Computers for Librarians Stuart J. Ferguson, Rodney Hebels, 2003-08-01 *Computers for Librarians* is aimed primarily at students of library and information management and at those library and information service professionals who feel the need for a book that will give them a broad overview of the emerging electronic library. It takes a top down approach starting with applications such as the Internet, information sources and services, provision of access to information resources and library management systems, before looking at data management, computer systems and technology, data communications and networking and library systems development. It also provides an interesting set of case studies which help to put theoretical and technical issues into context. *Computers for Librarians* can be read as a survey of where we are in terms of the electronic library but it is also intended as an educational resource and includes self-learning aids such as learning objectives, keywords and review questions for each chapter. **Encyclopedia of Library and Information Sciences** John D.
