

The background of the book cover is a photograph of a person standing on a vast, flat, sandy beach, looking out at the ocean. The sky is a deep blue, and a large, glowing, pale yellow moon is visible in the upper right. The person is a small silhouette in the distance, standing on the wet sand where the tide has receded. The overall mood is contemplative and serene.

Golden Years? Deborah Carr, 2019-01-22 Thanks to advances in technology medicine Social Security and Medicare old age for many Americans is characterized by comfortable retirement good health and fulfilling relationships But there are also millions of people over 65 who struggle with poverty chronic illness unsafe housing social isolation and mistreatment by their caretakers What accounts for these disparities among older adults Sociologist Deborah Carr s *Golden Years* draws insights from multiple disciplines to illuminate the complex ways that socioeconomic status race and gender shape the nearly every aspect of older adults lives By focusing on an often invisible group of vulnerable elders *Golden Years* reveals that disadvantages accumulate across the life course and can diminish the well being of many Carr connects research in sociology psychology epidemiology gerontology and other fields to explore the well being of older adults On many indicators of physical health such as propensity for heart disease or cancer black seniors fare worse than whites due to lifetimes of exposure to stressors such as economic hardships and racial discrimination and diminished access to health care In terms of mental health Carr finds that older women are at higher risk of depression and anxiety than men yet older men are especially vulnerable to suicide a result of complex factors including the rigid masculinity expectations placed on this generation of men Carr finds that older adults physical and mental health are also closely associated with their social networks and the neighborhoods in which they live Even though strong relationships with spouses families and friends can moderate some of the health declines associated with aging women and especially women of color are more likely than men to live alone and often cannot afford home health care services a combination that can be isolating and even fatal Finally social inequalities affect the process of dying itself with white and affluent seniors in a better position to convey their end of life preferences and use hospice or palliative care than

their disadvantaged peers Carr cautions that rising economic inequality the lingering impact of the Great Recession and escalating rates of obesity and opioid addiction among other factors may contribute to even greater disparities between the haves and the have nots in future cohorts of older adults She concludes that policies such as income supplements for the poorest older adults expanded paid family leave and universal health care could ameliorate or even reverse some disparities A comprehensive analysis of the causes and consequences of later life inequalities Golden Years demonstrates the importance of increased awareness strong public initiatives and creative community based programs in ensuring that all Americans have an opportunity to age well *Innovative Interventions To Reduce Dementia Caregiver Distress* David W. seriously ill dying and bereaved people has been acknowledged from the very beginning of the hospice and palliative care movement While often referring to the rewards and satisfactions of the work Dame Cicely Saunders was the first to acknowledge that helping encounters with dying patients and distressed relatives could be a source of anguish and grief for dedicated and compassionate carers Caregiver Stress and Staff Support in Illness Dying and Bereavement discusses the challenge of finding a balance between the support needs of patients families and staff and the resources available With contributions from practitioners and researchers from around the world this book recognizes that palliative care today is being provided in many different settings and that there may be wide variations in the way individuals and organizations identify and manage the stressors that arise through the work This unique collection of international perspectives on the complexities and management of caregiver stress and staff support builds on the firm foundation Mary Vachon built over thirty years ago in her studies yet broadens the scope to include significant social political and cultural variations on the theme
