Development Methodologies for Big Data Analytics Systems Manuel Mora, Fen Wang, Jorge Marx Gomez, Hector Duran-Limon, 2023-11-03. This book presents research in big data analytics (BDA) for business of all sizes. The authors analyze problems presented in the application of BDA in some businesses through the study of development methodologies based on three approaches: 1. plan driven, 2. agile, and 3. hybrid lightweight. The authors first describe BDA systems and how they emerged with the convergence of Statistics, Computer Science, and Business Intelligent Analytics, with the practical aim to provide concepts, models, methods, and tools required for exploiting the wide variety, volume, and velocity of available business internal and external data, i.e. Big Data, and provide decision making value to decision makers. The book presents high quality conceptual and empirical research oriented chapters on plan driven, agile, and hybrid lightweight development methodologies and relevant supporting topics for BDA systems suitable to be used for large, medium, and small sized business organizations.

Handbook of Big Data and Analytics in Accounting and Auditing Tarek Rana, Jan Svanberg, Peter Öhman, Alan Lowe, 2023-02-03. This handbook collects the most up to date scholarship knowledge and new developments of big data and data analytics by bringing together many strands of contextual and disciplinary research. In recent times, while there has been considerable research in exploring the role of big data, data analytics, and textual analytics in accounting and auditing, we still lack evidence on what kinds of best practices academics, practitioners, and organizations can implement and use. To achieve this aim, the handbook focuses on both conventional and contemporary issues facing by academics, practitioners, and organizations, particularly when technology and business environments are changing faster than ever. All the chapters in this handbook provide both retrospective and contemporary views and commentaries by leading and knowledgeable scholars in

the field who offer unique insights on the changing role of accounting and auditing in today's data and analytics driven environment. Aimed at academics, practitioners, students and consultants in the areas of accounting, auditing and other business disciplines, the handbook provides high level insight into the design, implementation and working of big data and data analytics practices for all types of organizations worldwide. The leading scholars in the field provide critical evaluations and guidance on big data and data analytics by illustrating issues related to various sectors such as public, private, not for profit and social enterprises. The handbook's content will be highly desirable and accessible to accounting and non accounting audiences across the globe.
