

Chemistry Formal Lab Report Format

50 points

You will construct a lab report using the guidelines listed below.

- ✓ Lab reports must be typed.
- ✓ This write-up is to be your own work. Once you finish taking data, you are on your own. Except for the data, **NOTHING** in this report (including graphs) should be identical to your lab partner's.
- ✓ Any information taken from outside sources must be properly cited. Large amounts of information should not be copied and pasted into your report—even if it is cited.

Format:

- **Title** (should be detailed enough to give an overview of the lab.) "Enzyme Lab" is too vague. "The Effect of Temperature, pH and Salinity on Enzyme Activity" is better. **(2 points)**
- **Objective/Hypothesis/Variables (5 points)**
 - Include variables (independent and dependent); state specifically what you will be measuring.
 - Examples of Objectives:
 - Good: "To measure the effect environmental variables such as light intensity, humidity, and wind on the rate of transpiration in plants".
 - Not so good "To look at the effect of various conditions on water loss in plants."
 - Hypothesis – It should be testable and written in an "if-then" or "a difference will occur" format.
 - Variables
 - Independent—Include the variable(s) and the conditions.
 - Dependent—State the variable(s) and discuss how it will be measured.
 - Identify the control group and the experimental group(s).
 - Experimental Controls/Constants.
- **Materials (3 points)**
 - List all materials needed for the lab.
- **Procedure (10 points)**
 - List ALL steps to the procedure.
- **Data/Observations (10 points)**
 - Include data tables and any charts and graphs.
 - Charts and graphs should be computer generated and should have titles.
 - All graphs should be based on class data unless otherwise indicated.
 - Requirements for a good graph:
 - Title
 - Label axes with title and units
 - Calibrate axes in regular increments
 - Plot all points
 - Add a line or curve of best fit— NOT a connect the dots graph
 - Include a legend if more than one set of data is on the same graph.
