Apollo 11 Robert Godwin, 1999 CD ROM and Book Foreword written by Buzz Aldrin Since the first glimmerings of intellect on planet Earth the moon's quicksilver light has beckoned On July of 1969 the people of the world were witness to an event which was the undisputed scientific accomplishment of the 20th century When astronauts Neil Armstrong and Edwin Buzz Aldrin planted their footsteps in the barren dusty powder of the lunar surface they not only fulfilled President John Kennedy's bold challenge but also mankind's ancient dream An accomplishment without parallel the flight of Apollo 11 stands alone as humanity's greatest feat of imagination made manifest Some of the rare official documentation of this inspirational voyage is collected and made commercially available for the first time **The Complete Book of Spaceflight** David Darling, 2008-04-21 A commanding encyclopedia of the history and principles of spaceflight from earliest conceptions to faster than light galaxy hopping Here is the first truly comprehensive guide to space exploration and propulsion from the first musings of the Greeks to current scientific speculation about interstellar travel using warp drives and wormholes Space buffs will delight in its in depth coverage of all key manned and unmanned missions and space vehicles past present and projected and its clear explanations of the technologies involved Over the course of more than 2 000 extensively cross referenced entries astronomer David Darling also provides fascinating insights into the cultural development of spaceflight In vivid accounts of the major characters and historical events involved he provides fascinating tales of early innovators the cross pollination that has long existed between science fiction and science fact and the sometimes obscure links between geopolitics warfare and advances in rocketry **Selene's Two Faces**, 2018-08-13 If any scientific object has over the course of human history aroused the fascination of both scientists and artists worldwide it is beyond doubt the moon The moon is also by far the most interesting celestial body when it comes to reflecting on the dualistic nature of photography as applied to the study of the universe Against this background Selene's Two Faces sets out to look at the scientific purpose aesthetic expression and influence of early lunar drawings maps and photographs including spacecraft imaging In its approach Selene's Two Faces is intermedial intercultural and interdisciplinary It brings together not only various media photography maps engravings lithographs globes texts and cultures from Europe America and Asia but also theoretical perspectives See inside the book **Krafft Ehricke's Extraterrestrial Imperative** Marsha Freeman, Krafft A. Ehricke, 2009 From this book the reader will gain an insight into one of the most creative minds in the history of space exploration Krafft Ehricke's contribution to space exploration encompasses details of new innovative ideas but also how to think about the importance and value of space exploration for society The reader will gain an understanding of the early history of the space pioneers what they have helped accomplish and how Ehricke's vision of where we should be going can shape the future At this time when there are questions about the path of the space program for the next decades Krafft Ehricke has laid out the philosophical framework for why space exploration must be pursued through his concept of the

Extraterrestrial Imperative and the fight that he waged over many years for a long range vision for the program Readers will find it a very imaginative work and a very up lifting story Krafft Ehricke s Extraterrestrial Imperative is the summation of his work on encouraging the exploration and development of space The book contains all of his reasons why we need to get off the planet and explore space *Space Rescue* Shayler David,2009-03-17 In *Space Rescue* Ensuring the Safety of Manned Spacecraft author David J Shayler reviews the development of crew survival and escape methods from the earliest designs of manned spacecraft to the current discussions of systems for ISS and on to the future prospect of sending men and women out towards Mars David Shayler reviews the numerous proposed systems of crew rescue and also analyses the adopted systems of ejection seats escape towers and abort profiles during the ascent from Earth to space including the safety requirements and contingency procedures available during various mission profiles to get the crew safely back to Earth The author also examines the various wilderness training programs and abort simulations used to help prepare the crews for almost any unplanned and emergency contingency they may face during their mission *Team Moon* Catherine Thimmesh,2019-04-17 This behind the scenes look at the first Apollo moon landing has the feel of a public television documentary in its breadth and detail Publishers Weekly starred review Here is a rare perspective on a story we only thought we knew For Apollo 11 the first moon landing is a story that belongs to many not just the few and famous It belongs to the seamstress who put together twenty two layers of fabric for each space suit To the engineers who created a special heat shield to protect the capsule during its fiery reentry It belongs to the flight directors camera designers software experts suit testers telescope crew aerospace technicians photo developers engineers and navigators Gathering direct quotes from some of these folks who worked behind the scenes Catherine Thimmesh reveals their very human worries and concerns Culling NASA transcripts national archives and stunning NASA photos from Apollo 11 she captures not only the sheer magnitude of this feat but also the dedication ingenuity and perseverance of the greatest team ever the team that worked to first put man on that great gray rock in the sky Winner of the Robert F Sibert Informational Book Award An edge of your seat adventure Lavishly illustrated This exhilarating book will captivate Chicago Sun Times Thimmesh gives names and voices to the army that got Neil Armstrong and company to the moon and back The result is a spectacular and highly original addition to the literature of space exploration The Horn Book This beautiful and well documented tribute will introduce a new generation to that triumphant time Kirkus Reviews starred review *Apollo 7* Robert Godwin,2000 Accompanying CD ROM includes movies and images of the flight **Digital Apollo** David A. Mindell,2011-09-30 The incredible story of how human pilots and automated systems worked together to achieve the ultimate achievement in flight the lunar landings of NASA s Apollo program As Apollo 11 s Lunar Module descended toward the moon under automatic control a program alarm in the guidance computer s software nearly caused a mission abort Neil Armstrong responded by switching off the automatic mode and taking direct control He stopped monitoring the computer and began flying the spacecraft relying on skill to land it and

earning praise for a triumph of human over machine In Digital Apollo engineer historian David Mindell takes this famous moment as a starting point for an exploration of the relationship between humans and computers in the Apollo program In each of the six Apollo landings the astronaut in command seized control from the computer and landed with his hand on the stick Mindell recounts the story of astronauts desire to control their spacecraft in parallel with the history of the Apollo Guidance Computer From the early days of aviation through the birth of spaceflight test pilots and astronauts sought to be more than spam in a can despite the automatic controls digital computers and software developed by engineers Digital Apollo examines the design and execution of each of the six Apollo moon landings drawing on transcripts and data telemetry from the flights astronaut interviews and NASA s extensive archives Mindell s exploration of how human pilots and automated systems worked together to achieve the ultimate in flight a lunar landing traces and reframes the debate over the future of humans and automation in space The results have implications for any venture in which human roles seem threatened by automated systems whether it is the work at our desktops or the future of exploration **First Man** James R.

Hansen,2012-11-27 On July 20 1969 the world stood still to watch American astronaut Neil A Armstrong become the first person ever to step on the surface of another heavenly body Upon his return to Earth Armstrong was celebrated for his monumental achievement He was also as NASA historian Hansen reveals in this authorized biography misunderstood Armstrong s accomplishments as an engineer a test pilot and an astronaut have long been a matter of record but Hansen s access to private documents and unpublished sources and his interviews with more than 125 subjects including more than fifty hours with Armstrong himself yield the first in depth analysis of this elusive reluctant hero **Software Architecture**
