And Principle Population Writings Penguin Classics:

An Essay on the Principle of Population and Other Writings Thomas Malthus, 2015-06-04 Malthus life s work on human population and its dependency on food production and the environment was highly controversial on publication in 1798 He predicted what is known as the Malthusian catastrophe in which humans would disregard the limits of natural resources and the world would be plagued by famine and disease He significantly influenced the thinking of Darwin and Alfred Russel Wallace and his theories continue to raise important questions today in the fields of social theory economics and the environment With an introduction by Robert Mayhew

Women Writing Men Joanne Ella Parsons, Ruth Heholt, 2022-06-08 This book explores how women writers create and question men and masculinity As men have written women so have women written men Debate about how men have represented women in literature has a long and distinguished history however there has been much less examination of the ways in which women writers depict male characters This is clearly a notable absence given the recent rise in interest in the field of 18th and 19th century masculinities Women writers were in a unique position to be able to deconstruct and examine cultural norms from a position away from the centre This enabled women to look aslant at masculinity using their female gaze to expose the ruptures and cracks inherent within the rigid formation of the manly ideal This collection focuses on women s representations of men and masculinity as they negotiate issues of class gender race and sexuality *Women Writing Men 1689 to 1869* will be of interest to academics researchers and advanced students of Literature Gender Studies Critical Theory and Cultural Studies The chapters in this book were originally published as a special issue of *Women s Writing*

Pathologies of Climate Governance Paul G. Harris, 2021-02-25 An overview of the obstacles to effective climate governance including international relations national politics and psychosocial factors

The New Science of the Enchanted Universe Marshall Sahlins, 2023-12-05 The vast majority of human societies known to us have been organized along immanentist lines In such societies as Marshall Sahlins argues everything we associate with religion gods and spirits of every sort is part of the daily embodied immanent lives of people Plants and animals have souls and the same essential attributes as other persons and supposedly long dead ancestors continue to live among people communicate with them and have sway over the course of events In this enchanted type of society there is no strict separation between economics politics religion philosophy and culture Some 2 500 years ago at the dawn of the so called Axial Age a radical transformation in human societies began when civilizations spread around the globe from their origins in Greece the Near East northern India and China These civilizations effected a cultural revolution creating a new type of society in which the things we typically associate with religion move from immanent infrastructure to transcendent superstructure Only in a transcendentalist society does it make sense to speak of a god or God and of a heaven out there above us or in a separate realm entirely And only in such a society do we have a division of labour separating out an economic sphere from a political sphere and a sphere of culture Transcendentalist

worldviews and modes of life are of course pervasive today They are so much a part of who we are that when we attempt to understand the nature and workings of immanentist societies we often misdescribe them in transcendentalist terms This confusion observes Sahlins has long bedeviled the social sciences and consequently has impeded our understanding of many Indigenous religions and worldviews past and present Sahlins drawing on a vast array of recent and older ethnographic and historical research offers this book as both diagnosis of these ills and a call to correction to develop a new science that would be better positioned to grasp the realities of immanentist societies and to take seriously the cultures of others Research Handbook on Law and Utilitarianism Guillaume Tusseau,2024-10-03 The Research Handbook on Law and Utilitarianism sheds light on contemporary legal culture and the ways in which it interacts with theories of justice Guillaume Tusseau brings together an interdisciplinary range of scholars to analyse the utilitarian standpoint on legal disciplines and legal governance as well as the contribution of utilitarian arguments to current legal debates **The Idea of Justice** Amartya Sen,2011-05-31 More than a matter of intellectual discourse the idea of justice plays a real role in how and how well people live Here Amartya Sen offers a powerful critique of the theory of social justice that in its grip on social and political thinking has long left practical realities far behind *Reader's Guide to the History of Science* Arne Hessenbruch,2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn **Sex, Suffrage and the Stage** Leslie Hill,2018-06-16 Marking the 100 year anniversary of women's suffrage Leslie Hill provides a fascinating survey of the history of first wave feminism in British theatre from the London premiere of Ibsen's *A Doll's House* in 1889 through the militant suffrage movement Hill's approachable overview explores some of the pivotal ways in which theatre makers both engaged with and influenced feminist discourse on topics such as sexual agency reproductive rights marriage equality financial independence and suffrage Clear and concise this is an ideal resource for undergraduate and postgraduate students of theatre and performance studies taking courses on Women in Theatre and Performance Staging Feminism Early Feminist Theatre Theatre and Suffrage Gender and Theatre Political Theatre and Performance Historiography This text will also appeal to scholars lecturers and Literature students New Perspectives on Malthus Robert J. Mayhew,2016-06-20 Thomas Robert Malthus 1766 1834 was a pioneer in demography economics and social science more generally whose ideas prompted a new Malthusian way of thinking about population and the poor On the occasion of the two hundred and fiftieth anniversary of his birth *New Perspectives on Malthus* offers an up to date collection of interdisciplinary essays from leading Malthus experts who reassess his work Part one looks at Malthus's achievements in historical context addressing not only perennial questions such as his attitude to the Poor Laws but also new topics including his response to environmental themes and his

use of information about the New World Part two then looks at the complex reception of his ideas by writers scientists politicians and philanthropists from the period of his own lifetime to the present day from Charles Darwin and H G Wells to David Attenborough Al Gore and Amartya Sen **International Relations Theory** Mark V. Kauppi, Paul R. Viotti, 2023-08-15 International Relations Theory offers a unique approach to help students think conceptually and critically about how our contemporary world of diverse state and non state actors works but also the implications of domestic and global changes The seventh edition covers current IR theory images realism liberalism economic structuralism and the English School interpretive understandings constructivist feminist postmodern critical theory and green theory normative considerations and intellectual foundations from the ancient world to the modern era
