Mythical Geography Jasper Quincy, AI, 2025-05-06 Mythical Geography embarks on a captivating journey to uncover the real world inspirations behind fabled locations It investigates how geographical phenomena historical events and ancient cultures may have given rise to enduring myths like Atlantis El Dorado and the Garden of Eden The book uniquely combines the disciplines of history earth sciences and geography to explore these connections revealing how early civilizations perceived and interpreted their surroundings Did you know for instance that the legend of Atlantis may have roots in actual volcanic eruptions or geological events Or that tales of El Dorado could be linked to early explorations of South America and the perception of its resources

The book examines a range of mythical places from well known examples to lesser known tales such as Thule and Agartha drawing on historical accounts archaeological discoveries and geological records It argues that many celebrated mythical geographies are not pure invention but are rooted in or influenced by real world locations By exploring these connections the book offers a fresh perspective on cultural history environmental perception and the interplay between human imagination and the physical world The book progresses by first introducing the core concept then exploring well known mythical locations and finally delving into lesser known examples from various cultures Islands in Geography, Law, and Literature

Chiara Battisti, Sidia Fiorato, Matteo Nicolini, Thomas Perrin, 2022-04-04 This collection explores the heterogeneous places we have traditionally been taught to term islands It stages a conversation on the very idea of island ness thus contributing to a new field of research at the crossroads of law geography literature urban planning politics arts and cultural studies The contributions to this volume discuss the notion of island ness as a device triggering the imagination triggering narratives and representations in different creative fields they explore the interactions between legal socio political and fictional approaches to remoteness and the state of insularity policy responses to both remoteness and boundaries on different scales and the insular legal framing of geographical remoteness The product of a cross disciplinary exchange on islands this edited volume will be of great interest to those working in the fields of Island Studies as well as literary studies scholars geographers and legal scholars

New Perspectives on Jewish Cultural History Maja Gildin Zuckerman, Jakob Egholm Feldt, 2019-08-19 This book presents original studies of how a cultural concept of Jewishness and a coherent Jewish history came to make sense in the experiences of people entangled in different historical situations Instead of searching for the inconsistencies discontinuities or ruptures of dominant grand historical narratives of Jewish cultural history this book unfolds situations and events where Jewishness and a coherent Jewish history became useful meaningful and acted upon as a site of causal explanations Inspired

by classical American pragmatism and more recent French pragmatism we present a new perspective on Jewish cultural history in which the experiences problems and actions of people are at the center of reconstructions of historical causalities and projections of future horizons The book shows how boundaries between Jewish and non Jewish are not a priori given but are instead repeatedly experienced in a variety of situations and then acted upon as matters of facts In different ways and on different scales these studies show how people s experiences of Jewishness perpetually probe test and shape the boundaries between what is Jewish and non Jewish and that these boundaries shape the spatiotemporal linkages that we call history
