Left Brain, Right Stuff Phil Rosenzweig,2014-01-07 Left Brain Right Stuff takes up where other books about decision making leave off For many routine choices from shopping to investing we can make good decisions simply by avoiding common errors such as searching only for confirming information or avoiding the hindsight bias But as Phil Rosenzweig shows for many of the most important more complex situations we face in business sports politics and more a different way of thinking is required Leaders must possess the ability to shape opinions inspire followers manage risk and outmaneuver and outperform rivals Making winning decisions calls for a combination of skills clear analysis and calculation left brain as well as the willingness to push boundaries and take bold action right stuff Of course leaders need to understand the dynamics of competition to anticipate rival moves to draw on the power of statistical analysis and to be aware of common decision errors all features of left brain thinking But to achieve the unprecedented in real world situations much more is needed Leaders also need the right stuff In business they have to devise plans and inspire followers for successful execution in politics they must mobilize popular support for a chosen program in the military commanders need to commit to a battle strategy and lead their troops and in start ups entrepreneurs must manage risk when success is uncertain In every case success calls for action as well as analysis and for courage as well as calculation Always entertaining often surprising and immensely practical Left Brain Right Stuff draws on a wealth of examples in order to propose a new paradigm for decision making in synch with the way we have to operate in the real world Rosenzweig s smart and perceptive analysis of research provides fresh and often surprising insights on topics such as confidence and overconfidence the uses and limits of decision models the illusion of control expert performance and deliberate practice competitive bidding and new venture management and the true nature of leadership
