Algebraic Surfaces Classics In Mathematics:

Algebraic Surfaces Oscar Zariski, 2012-12-06 The aim of the present monograph is to give a systematic exposition of the theory of algebraic surfaces emphasizing the interrelations between the various aspects of the theory algebro geometric topological and transcendental To achieve this aim and still remain inside the limits of the allotted space it was necessary to confine the exposition to topics which are absolutely fundamental The present work therefore makes no claim to completeness but it does however cover most of the central points of the theory A presentation of the theory of surfaces to be effective at all must above all give the typical methods of proof used in the theory and their underlying ideas It is especially true of algebraic geometry that in this domain the methods employed are at least as important as the results The author has therefore avoided as much as possible purely formal accounts of results The proofs given are of necessity condensed for reasons of space but no attempt has been made to condense them beyond the point of intelligibility In many instances due to exigencies of simplicity and rigor the proofs given in the text differ to a greater or less extent from the proofs given in the original papers *Algebraic Surfaces* Oscar Zariski, 1995

Symplectic 4-Manifolds and Algebraic Surfaces Denis Auroux, Fabrizio Catanese, Marco Manetti, Gang Tian, Paul Seidel, Bernd Siebert, Ivan Smith, 2008-04-17 Modern approaches to the study of symplectic 4 manifolds and algebraic surfaces combine a wide range of techniques and sources of inspiration Gauge theory symplectic geometry pseudoholomorphic curves singularity theory moduli spaces braid groups monodromy in addition to classical topology and algebraic geometry combine to make this one of the most vibrant and active areas of research in mathematics It is our hope that the five lectures of the present volume given at the C I M E Summer School held in Cetraro Italy September 2 10 2003 will be useful to people working in related areas of mathematics and will become standard references on these topics The volume is a coherent exposition of an active field of current research focusing on the introduction of new methods for the study of moduli spaces of complex structures on algebraic surfaces and for the investigation of symplectic topology in dimension 4 and higher

The Unreal Life of Oscar Zariski Carol Parikh, 2014-05-10 The Unreal Life of Oscar Zariski records the life of Oscar Zariski that is based upon Carol Parikh s interviews with his family colleagues students and his own

memories from tape recorded interviews conducted before his death in 1986 This book describes Oscar Zariski's work in mathematics that perpetually altered the foundations of algebraic geometry The powerful tools he forged from the ideas of algebra allowed him to penetrate classical problems with a clarity and depth that brought a rigor to the way algebraic geometers carry out proofs The strength of his work was matched by his forcefulness as a teacher and the students he trained at Johns Hopkins and later at Harvard have made essential contributions to many areas of mathematics This publication is beneficial to students and researchers interested in Oscar Zariski's life and work in mathematics **Algebraic Geometry II** I.R. Shafarevich, 1995-12-21 This two part volume contains numerous examples and insights on various topics The authors have taken pains to present the material rigorously and coherently This book will be immensely useful to mathematicians and graduate students working in algebraic geometry arithmetic algebraic geometry complex analysis and related fields **Lectures on K3 Surfaces** Daniel Huybrechts, 2016-09-26 Simple enough for detailed study rich enough to show interesting behavior K3 surfaces illuminate core methods in algebraic geometry Algebraic Surfaces S. S. Abhyankar, Jeffrey Lipman, D. Mumford, 1995-02-15 *Singularity Theory* Denis Chacón, 2007 The Singularity School and Conference took place in Luminy Marseille from January 24th to February 25th 2005 More than 180 mathematicians from over 30 countries converged to discuss recent developments in singularity theory The volume contains the elementary and advanced courses conducted by singularities specialists during the conference general lectures on singularity theory and lectures on applications of the theory to various domains The subjects range from geometry and topology of singularities through real and complex singularities to applications of singularities
