Abulecentrism Olurinde Lafe, 2013-07-18 The book describes a development concept called abulecentrism The Yoruba word abule pronounced a boo lay literarily means the village abulecentrism seeks to achieve rapid and sustainable development of a given society by the strategic execution of projects and the provision of critical services at the local community level The village has always been the traditional unit of communal living in many societies around the world The typical village is small comprising close knit social groups and individuals that number in the tens or at most low hundreds In a village people live close to one another and derive strength in their communal methods of living working and protecting their society Furthermore the management and governance of the community is simpler than in urban areas because the village requires smaller administrative systems abulecentrism is built on the philosophy of using small modular systems such as a village as building blocks for developing the greater society. The ultimate goal of abulecentrism is for the larger society to be significantly impacted by the dividends of the aggregated development attained within the different communities Development projects will typically be executed by starting with a few local communities and progressing organically until all the communities that make up the larger society have been impacted Every Household Its Own Government Daniel Jordan Smith, 2022-03-08 An up close account of how Nigerians self reliance in the absence of reliable government services enables official dysfunction to strengthen state power When Nigerians say that every household is its own local government what they mean is that the politicians and state institutions of Africa's richest most populous country cannot be trusted to ensure even the most basic infrastructure needs of their people Daniel Jordan Smith traces how innovative entrepreneurs and ordinary citizens in Nigeria have forged their own systems in response to these deficiencies devising creative solutions in the daily struggle to survive Drawing on his three decades of experience in Nigeria Smith examines the many ways Nigerians across multiple social strata develop technologies businesses social networks political strategies cultural repertoires and everyday routines to cope with the constant failure of government infrastructure He describes how Nigerians provide for basic needs like water electricity transportation security communication and education and how their inventiveness comes with consequences On the surface it may appear that their self reliance and sheer hustle render the state irrelevant In reality the state is not so much absent as complicit Smith shows how private efforts to address infrastructural shortcomings require regular engagement with government officials shaping the experience of citizenship and strengthening state power Every Household Its Own Government reveals how these dealings have contributed to forms and practices of governance that thrive on official dysfunction and perpetuate the very inequalities and injustices that afflict struggling Nigerians 1992 **Census of Governments** ,1997 Classify, Exclude, Police Laurent Fourchard, 2021-04-14 b CLASSIFY EXCLUDE POLICE Laurent Fourchard's deep first hand knowledge of the history and contemporary politics of Nigeria and South Africa forms the basis of an insightful and compelling analysis of how states produce invidious distinctions among their people and
