

APPLICATION

Amsco Lab 250 and Amsco Lab 110 Small Sterilizers are designed for use in laboratory and industrial applications. Three sterilizer configurations are available.

- **Gravity** – designed for sterilization of non-porous heat- and moisture-stable goods, sterilization of liquids and media in borosilicate glass containers with vented closures, and decontamination of supplies after laboratory procedures. The gravity sterilizer is equipped with gravity and liquid cycles.
- **Prevacuum** – designed for fast, efficient sterilization of porous, heat- and moisture-stable materials, in addition to the same sterilization capabilities as the gravity sterilizer. The prevacuum sterilizer is equipped with prevacuum, gravity, liquid, leak test, and daily air removal test cycles. The vacuum level as well as the charge level for the prevac pulses are adjustable.
- **Isothermal** – designed for low temperature sterilization of heat-sensitive and heat-coagulable materials in addition to the same sterilization capabilities as the gravity sterilizer. The isothermal sterilizer is equipped with isothermal, gravity, and liquid cycles.

Each configuration includes choice of a single or double door, for open or recessed mounting.*

* Recess two wall mounting not available for 16" x 16" x 26" (406 x 406 x 660 mm) double door sterilizers.
