

The background of the book cover is a sepia-toned landscape painting. It depicts a coastal scene with several islands or headlands in the distance. The water is a muted greenish-blue. In the lower right, a small, dark, rocky island is visible. In the lower left, a small sailing ship with three masts is on the water. The sky is a pale, hazy green. The overall style is that of a 19th-century landscape painting.

An Inquiry Into Modes Of Existence An Anthropology Of The Moderns:

An Inquiry Into Modes of Existence Bruno Latour, 2013-08-19 In a new approach to philosophical anthropology Bruno Latour offers answers to questions raised in *We Have Never Been Modern* If not modern what have we been and what values should we inherit *An Inquiry into Modes of Existence* offers a new basis for diplomatic encounters with other societies at a time of ecological crisis *John Henry Newman and the Crisis of Modernity* Brian W. Hughes, Danielle

Nussberger, 2018-11-08 This book blends historical theological and philosophical inquiries into what modernity means with the aim of showing how Newman can analyze critique and explain fruitful ways forward within a diverse range of subjects First it surveys historical and theological topics such as how Newman understood modernity the *sensus fidelium* the role of doubt and modern views of reason Newman's university ideal and a return to the saint for much needed anthropological insights Second the volume shows how Newman's thought can be insightfully applied to key issues within church and society the need to redefine American Catholicism the challenge of secularization the role of Christian joy revelation and religious diversity progress traps and the ecological crisis and overcoming post modern individualism Throughout each chapter contributors consistently bring Newman's original and penetrating thought to bear upon critical themes in theological anthropology ecclesiology comparative theology and spirituality The volume shows how Newman's thought can be extended and enriched by dialogue with contemporary thinkers such as Charles Taylor Pope Francis and Bruno Latour In brief the contributors demonstrate how Newman can help frame contemporary self understandings and various theological and social imaginaries in the light of faith *Applying the Actor-Network Theory in Media Studies* Spöhrer, Markus, Ochsner,

Beate, 2016-08-24 Actor Network Theory ANT originally a social theory seeks to organize objects and non human entities into social networks Its most innovative claim approaches these networks outside the anthropocentric view including both humans and non human objects as active participants in a social context because of this the theory has applications in a myriad of domains not merely in the social sciences *Applying the Actor Network Theory in Media Studies* applies this novel approach to media studies This publication responds to the current trends in international media studies by presenting ANT as the new theoretical paradigm through which meaningful discussion and analysis of the media its production and its social and cultural effects Featuring both case studies and theoretical and methodical meditations this timely publication thoroughly considers the possibilities of these disparate yet divergent fields This book is intended for use by researchers students sociologists and media analysts concerned with contemporary media studies **French Philosophy of**

Technology Sacha Loeve, Xavier Guchet, Bernadette Bensaude Vincent, 2018-05-28 Offering an overall insight into the French tradition of philosophy of technology this volume is meant to make French speaking contributions more accessible to the international philosophical community The first section *Negotiating a Cultural Heritage* presents a number of leading 20th century philosophical figures from Bergson and Canguilhem to Simondon Dagonnet or Ellul and intellectual movements from

Personalism to French Cybernetics and political ecology that help shape philosophy of technology in the Francophone area and feed into contemporary debates ecology of technology politics of technology game studies The second section Coining and Reconfiguring Technoscience traces the genealogy of this controversial concept and discusses its meanings and relevance A third section Revisiting Anthropological Categories focuses on the relationships of technology with the natural and the human worlds from various perspectives that include anthropotechnology Anthropocene technological and vital norms and temporalities The final section Innovating in Ethics Design and Aesthetics brings together contributions that draw on various French traditions to afford fresh insights on ethics of technology philosophy of design techno aesthetics and digital studies The contributions in this volume are vivid and rich in original approaches that can spur exchanges and debates with other philosophical traditions *Interrogating Human Origins* Martin Porr, Jacqueline Matthews, 2019-12-06

Interrogating Human Origins encourages new critical engagements with the study of human origins broadening the range of approaches to bring in postcolonial theories and begin to explore the decolonisation of this complex topic The collection of chapters presented in this volume creates spaces for expansion of critical and unexpected conversations about human origins research Authors from a variety of disciplines and research backgrounds many of whom have strayed beyond their usual disciplinary boundaries to offer their unique perspectives all circle around the big questions of what it means to be and become human Embracing and encouraging diversity is a recognition of the deep complexities of human existence in the past and the present and it is vital to critical scholarship on this topic This book constitutes a starting point for increased interrogation of the important and wide ranging field of research into human origins It will be of interest to scholars across multiple disciplines and particularly to those seeking to understand our ancient past through a more diverse lens

Interdependence Kriti Sharma, 2015-06-01 From biology to economics to information theory the theme of interdependence is in the air framing our experiences of all sorts of everyday phenomena Indeed the network may be the ascendant metaphor of our time Yet precisely because the language of interdependence has become so commonplace as to be almost banal we miss some of its most surprising and far reaching implications In *Interdependence* biologist Kriti Sharma offers a compelling alternative to the popular view that interdependence simply means independent things interacting Sharma systematically shows how interdependence entails the mutual constitution of one thing by another how all things come into being only in a system of dependence on others In a step by step account filled with vivid examples Sharma shows how a coherent view of interdependence can help make sense not only of a range of everyday experiences but also of the most basic functions of living cells With particular attention to the fundamental biological problem of how cells pick up signals from their surroundings Sharma shows that only an account which replaces the perspective of individual cells interacting with external environments with one centered in interdependent recursive systems can adequately account for how life works This book will be of interest to biologists and philosophers to theorists of science of systems and of

cybernetics and to anyone curious about how life works Clear concise and insightful Interdependence Biology and Beyond explicitly offers a coherent and practical philosophy of interdependence and will help shape what interdependence comes to mean in the twenty first century

A Critical Ethnography of an Outdoor School Tristan Gleason,2021-09-30 By using critical ethnographic research to explore the practices and policies that sustain a residential outdoor school in the United States this book problematizes the relationship between science education and climate change politics in the United States Weaving together empirical data from fieldwork with theoretical resources spanning the sciences and humanities this book demonstrates how community activism political alliances and policy changes have guaranteed the survival of an outdoor school in Oregon This example enables artful reexamination of the relationship between science education politics and policy more broadly as well as the relation of science education to climate change politics in particular Gleason ultimately reconstructs science education towards epistemic and ontological pluralism and illustrates how critical ethnographic research can instigate a reimagining of the relationship between curriculum and how we relate to the world This book will benefit researchers academics and educators in higher education with an interest in the philosophical underpinnings and implications of science education environmental education and educational policy more broadly Those specifically interested in critical ethnographic research will also benefit from this book
