An Introduction To Statistical Problem Solving In Geography:

An Introduction to Statistical Problem Solving in Geography J. Chapman McGrew, Jr., Charles B. Monroe, 2009-04-22
Written for undergraduate geography majors and entry level graduate students with limited backgrounds in statistical analysis and methods McGrew and Monroe provide a comprehensive and understandable introduction to statistical methods in a problem solving framework Engaging examples and problems are drawn from a variety of topical areas in both human and physical geography and are fully integrated into the text Without compromising statistical rigor or oversimplifying the authors stress the importance of written narratives that explain each statistical technique After introducing basic statistical concepts and terminology the authors focus on nonspatial and spatial descriptive statistics They transition to inferential problem solving including probability sampling and estimation before delving deeper into inferential statistics for geographic problem solving The final chapters examine the related techniques of correlation and regression A list of major goals and objectives is included at the end of each chapter allowing students to monitor their own progress and mastery of geographic statistical materials An epilogue offering over 150 geographic situations gives students a chance to figure out which statistical technique should be used for a particular situation [An Introduction to Statistical Problem Solving in Geography](#)
Arthur J. Lembo, Jr., J. Chapman McGrew, Jr., 2023-10-27 The fourth edition of *An Introduction to Statistical Problem Solving in Geography* continues its standing as the definitive introduction to statistics and quantitative analysis in geography Assuming no reader background in statistics the authors lay out the proper role of statistical analysis and methods in human and physical geography They delve into the calculation of descriptive summaries and graphics to explain geographic patterns and use inferential statistics parametric and nonparametric to test for differences t tests ANOVA relationships regression and correlation and spatial statistics point and area patterns spatial autocorrelation This edition introduces more advanced topics including logistic regression two factor ANOVA and spatial estimation inverse distance weighting Kriging Many chapters also include thought provoking discussions of statistical concepts as they relate to the COVID 19 pandemic Maintaining an exploratory and investigative approach throughout the authors provide readers with real world geographic issues and more than 50 map examples Concepts are explained clearly and narratively without oversimplification Each chapter concludes with a list of major goals and objectives An epilogue offers over 150 open ended geographic situations inviting students to apply their new statistical skills to solve problems currently affecting our world [An Introduction to Statistical Problem Solving in Geography](#) J.
