Oceans: A Very Short Introduction Dorrik Stow, 2018-01-25 The importance of the oceans to life on Earth cannot be overstated Liquid water covers more than 70% of our planet's surface and in past geological time has spread over 85% Life on Earth began in the oceans over 3.5 billion years ago and remained there for the great majority of that time Today the seas still provide 99% of habitable living space the largest repository of biomass and holds the greatest number of undiscovered species on the planet Our oceans are vital for the regulation of climate and with global warming and decreasing land area they have become increasingly important as the source of food energy in the form of oil and gas and for their mineral wealth Oceans also form a key part of the biogeochemical cycles of carbon nitrogen and other elements critical to life Nutrients in upwelling areas are spread by ocean currents and the plankton of the seas supports a wealth of wildlife In this Very Short Introduction Dorrik Stow analyses these most important components of our blue planet and considers their relationship with and exploitation by humans He shows how the oceans are an essential resource to our overpopulated world and discusses why exploration and greater scientific understanding of the oceans their chemistry and their mineral wealth are now a high priority Stow also explores what we know of how oceans originate and evolve and change the shape of the seafloor and nature of its cover the physical processes that stir the waters and mix such a rich chemical broth and the inseparable link between oceans and climate As polar ice melts and sea levels rise countless millions who have made their homes on low lying lands close to the sea are threatened As scientific exploration of the seas gathers pace the new knowledge gained of the ocean Earth systems and their interaction with the human environment is vital to our understanding of how we can preserve these ultimately fragile environments ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Poverty: A Very Short Introduction Philip N. Jefferson, 2018-05-31 No one wants to live in poverty Few people would want others to do so Yet millions of people worldwide live in poverty According to the World Bank over 700 million people lived on less than US \$2 a day in 2013 Why is that What has been done about it in the past And what is being done about it now In this Very Short Introduction Philip N. Jefferson explores how the answers to these

questions lie in the social political economic educational and technological processes that impact all of us throughout our lives The degree of vulnerability is all that differentiates us He shows how a person s level of vulnerability to adverse changes in their life is very much dependent on the circumstances of their birth including where their family lived the schools they attended whether it was peacetime or wartime whether they had access to clean water and whether they are male or female Arguing that whilst poverty is ancient and enduring the conversation about it is always new and evolving Jefferson looks at the history of poverty and the practical and analytical efforts we have made to eradicate it and the prospects for further poverty alleviation in the future ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
