An Ecological Approach To Perceptual Learning And Development:

An Ecological Approach to Perceptual Learning and Development Eleanor Jack Gibson, Anne D. Pick, 2003
Perceptual learning is emphasised as the discovery of affordances of events objects and places in the world and as the way meaningful perception develops **An Ecological Approach to Perceptual Learning and Development** Eleanor J. Gibson, Anne D. Pick, 2003-05-15 The essential nature of learning is primarily thought of as a verbal process or function but this notion conveys that pre linguistic infants do not learn Far from being blank slates that passively absorb environmental stimuli infants are active learners who perceptually engage their environments and extract information from them before language is available The ecological approach to perceiving defined as a theory about perceiving by active creatures who look and listen and move around was spearheaded by Eleanor and James Gibson in the 1950s and culminated in James Gibson's last book in 1979 Until now no comprehensive theoretical statement of ecological development has been published since Eleanor Gibson's *Principles of Perceptual Learning and Development* 1969 In *An Ecological Approach to Perceptual Learning and Development* distinguished experimental psychologists Eleanor J Gibson and Anne D Pick provide a unique theoretical framework for the ecological approach to understanding perceptual learning and development Perception in accordance with James Gibson's views entails a reciprocal relationship between a person and his or her environment The environment provides resources and opportunities for the person and the person gets information from and acts on the environment The concept of affordance is central to this idea the person acts on what the environment affords as it is appropriate This extraordinary volume covers the development of perception in detail from birth through toddlerhood beginning with the development of communication going on to perceiving and acting on objects and then to locomotion It is more than a presentation of facts about perception as it develops It outlines the ecological approach and shows how it underlies higher cognitive processes such as concept formation as well as discovery of the basic affordances of the environment This impressive work should serve as the capstone for Eleanor J Gibson's distinguished career as a developmental and experimental psychologist

Restoring the Human Context to Literary and Performance Studies Howard Mancing, Jennifer Marston William, 2022-01-28 *Restoring the Human Context to Literary and Performance Studies* argues that much of contemporary literary theory is still predicated at least implicitly on outdated linguistic and psychological models such as post structuralism psychoanalysis and behaviorism which significantly contradict current dominant scientific views By contrast this monograph promotes an alternative paradigm for literary studies namely Contextualism and in so doing highlights the similarities and differences among the sometimes conflicting contemporary cognitive approaches to literature and performance arguing not in favor of one over the other but for Contextualism as their common ground
