Philosophy of Blockchain Technology - Ontologies

Nicolae Sfetcu, 2019 About the necessity and usefulness of developing a philosophy specific to the blockchain technology emphasizing on the ontological aspects After an Introduction that highlights the main philosophical directions for this emerging technology in Blockchain Technology I explain the way the blockchain works discussing ontological development directions of this technology in Designing and Modeling The next section is dedicated to the main application of blockchain technology Bitcoin with the social implications of this cryptocurrency There follows a section of Philosophy in which I identify the blockchain technology with the concept of heterotopia developed by Michel Foucault and I interpret it in the light of the notational technology developed by Nelson Goodman as a notational system In the Ontology section I present two developmental paths that I consider important Narrative Ontology based on the idea of order and structure of history transmitted through Paul Ricoeur's narrative history and the Enterprise Ontology system based on concepts and models of an enterprise specific to the semantic web and which I consider to be the most well developed and which will probably become the formal ontological system at least in terms of the economic and legal aspects of blockchain technology In Conclusions I am talking about the future directions of developing the blockchain technology philosophy in general as an explanatory and robust theory from a phenomenologically consistent point of view which allows testability and ontologies in particular arguing for the need of a global adoption of an ontological system for develop cross cutting solutions and to make this technology profitable
