APA STYLE 7th Edition

What is APA Style?

- APA style does not refer to a writing style, rather, it is the editorial style developed by the American Psychological Association for use in the fields and journals of psychology. Other social and behavioral sciences have also adopted APA style for their own written material.
- Editorial style refers to the rules or guidelines published when it comes to consistent presentation of written materials. It includes:
 - Presentation and abbreviations
 - References citations
 - Table construction
 - Using electronic references
 - Handling references
 - Presenting statistics

Data Retention & Sharing

- It is the responsibility of researchers to give others access to their information at any point in the publication process, even after publication.
- Authors should keep their data for at least five years after the publication date.

- **Plagiarism:** It is expected that researchers will give proper credit for their research and not present the work of others as their own.
 - **Self-plagiarism:** Researchers should not present their own past publications as new scholarship.

Conflict of Interest

- It is best to note any activities or relationships that could appear to constitute a conflict of interest, even if the researcher doesn't believe they exist.
