Hadlington, Judith A. Johnston, 1996 This book is the tree lover's first aid manual Extensively illustrated including 40 color plates it tells you how to maintain your trees in good health how to diagnose their illnesses about their many enemies including humans the right medicine to administer and in extreme cases how to perform tree surgery **A Field Guide to Australian Trees** Ivan Holliday, Ron Hill, 1969 **Tree-kangaroos of Australia and New Guinea** Roger William Martin, 2005 To many people the suggestion that a kangaroo could live up a tree is fantasy Yet in the rainforests of Far North Queensland and New Guinea there are extraordinary kangaroos that do just that Many aspects of these marsupials anatomy and biology suggest a terrestrial kangaroo ancestor Yet no one has so far come forward with a convincing explanation of how why and when mammals that was so superbly adapted for life on the ground should end up back in the trees This book reviews the natural history and biology of tree kangaroos from the time of their first discovery by Europeans in the jungles of West Papua in 1826 right up to the present day covering the latest research being conducted in Australian and New Guinea Combining information from a number of disparate disciplines the author sets forth the first explanation of this apparent evolutionary conundrum Features Provides a fascinating and readable account of an unusual evolutionary conundrum Written by a field biologist with more than a decade's experience working with tree kangaroos **A Practical Treatise on Tree Culture in South Australia** John Ednie Brown, 2024-02-26 Reprint of the original first published in 1881

Australia's Remarkable Trees Richard Allen, 2009 Elephantine Boabs dot the Kimberley region of Western Australia Cattle rub against giant Bottle Trees and Ironbarks in Queensland and Strangler Figs with 40 metre girths thrive in our northern rainforests Snow Gums and Shining Gums eke out their lives on our icy mountain tops and prehistoric looking Bunya Pines which once looked down on the dinosaurs grow in a few isolated places in Australia's north east Australia's Remarkable

Trees explores the extraordinary lives of fifty of Australia's oldest largest and most unusual trees Richly illustrated with more than 500 photographs writer Richard Allen and photographer Kimbal Baker went to the far reaches of Australia travelling more than 60 000 kilometres to photograph them and tell their stories Australia's Remarkable Trees is not just a celebration of Australia's great trees It also prompts us to look to the future to see what lies in store for them It is a call to arms to preserve and protect our oldest and most magnificent living things and the forests and wilderness in which they live Tree Hollows and Wildlife Conservation in Australia Philip Gibbons,David Lindenmayer,2002-04-05 More than 300 species of Australian native animals mammals birds reptiles and amphibians use tree hollows but there has never been a complete inventory of them Many of these species are threatened or are in decline because of land use practices such as grazing timber production and firewood collection All forest management agencies in Australia attempt to reduce the impact of logging on hollow dependent fauna but the nature of our eucalypt forests presents a considerable challenge In some cases tree hollows suitable for vertebrate fauna may take up to 250 years to develop which makes recruiting and perpetuating this resource very difficult within the typical cycle of human induced disturbance regimes Tree Hollows and Wildlife Conservation in Australia is the first comprehensive account of the hollow dependent fauna of Australia and introduces a considerable amount of new data on this subject It not only presents a review and analysis of the literature but also provides practical approaches for land management *Trees for Saltland* N Marcar,D Crawford,P Leppert,T Jovanovic,R Floyd,R Farrow,1995-01-01 This book aims to assist in the management of soil salinity by describing a range of species tolerant of saline soils 60 species are listed with descriptions containing botanical features growth characteristics preferred soils climates and more The introductory sections of this book provide general information on issues such as how trees deal with saline soil their susceptibility to insect pests where to plant trees and how best to establish them The main section provides detailed descriptions of 30 species for use on salt affected land Australian National Bibliography ,1978
