Negotiating Universalism in India and Latin America Andres Mejia-Acosta, Louise Tillin, 2021-06-15 This book explores how vertical inter governmental political and fiscal bargains and horizontal variation in

political social and economic conditions across regions contribute to or undermine the provision of inclusive and sustainable social policies at the subnational level in Latin America and India The question of how to advance universal social rights while reducing territorial inequalities has been a central dilemma for Latin America and India After several decades of ambitious decentralization reforms in both regions the balance between local accountability versus centralized planning remains a theoretical and empirical problem in need of systematic exploration The chapters in this volume incorporate both federal and decentralized unitary states pointing to common political tensions across unitary and federal settings despite the typically greater institutionalization of regional autonomy in federal countries The contributors examine the territorial dimension of universalism and explore in greater and empirical detail the causal links between fiscal transfers social policies and outcomes and highlight the political dynamics that shape fiscal decentralization reforms and the welfare state The chapters in this book were originally published as a special issue of *Regional Federal Studies*

Making a Modern Political Order James J. Sheehan, 2023-05-01 Sheehan's thoughtful book makes a convincing case that the modern political order arises out of people's shared expectations and hopes without which the nation state could not exist Every political order depends on a set of shared expectations about how the order does and should work In *Making a Modern Political Order* James Sheehan provides a sophisticated analysis of these expectations and shows how they are a source of both cohesion and conflict in the modern society of nation states The author divides these expectations into three groups first expectations about the definition and character of political space which in the modern era are connected to the emergence of a new kind of state second expectations about the nature of political

communities that is about how people relate to one another and to their governments and finally expectations about the international system namely how states interact in a society of nation states Although Sheehan treats these three dimensions of the political order separately they are closely bound together each dependent on and reinforcing the others Ultimately he claims the modern nation state must balance all three organizing principles if it is to succeed Sheehan's project begins with an examination of people's expectations about political space community and international society in the premodern European world that came to be called the *ancien régime* He then in chapters on states nations and the society of nation states proceeds to trace the development of a modern political order that slowly and unevenly replaced the *ancien régime* in Europe and eventually spread throughout the world To close he offers some speculations about the horizon ahead of us beyond which lies a future order that may someday replace our own
