electronic resources including monographs journals databases indexes and abstracting tools websites and associations providing users with listings of authoritative informational resources of both classical and recently published works With chapters devoted to each of the main fields in the basic biological sciences this book offers a guide to the best and most up to date resources in biology It is appropriate for anyone interested in searching the biological literature from undergraduate students to faculty researchers and librarians The guide includes a supplementary website dedicated to keeping URLs of electronic and web based resources up to date a popular feature continued from the third edition Principles of Space Anthropology Cameron M. Smith,2019-09-16 This book shows how anthropology can provide an innovative perspective on the human movement into space It examines adaptation to space on timescales of generations rather than merely months or years and uses evolutionary adaptation as a guiding theme Employing the lessons of evolutionary adaptation Principles of Extraterrestrial Anthropology recommends evolutionarily sound strategies of space settlement covering genetics at the organismal and population levels The author organizes the concept of cultural adaptation to environments beyond Earth according to observed patterns in human adaptation on Earth He uses original artwork and tables to help convey complex information in a form accessible to undergraduate and graduate students Though primarily written to engage students interested in space settlement and exploration who will eventually build a full anthropology of space settlement Principles of Extraterrestrial Anthropology is engaging to anthropologists across sub disciplines as well as scholars interested in the human dimensions of space exploration and settlement Just as the term exobiology was invented only a few decades ago to shape the field of space life studies exoanthropology is outlined to assist in the perpetuation of Earth life through human space settlement **Working Together** Amy Poteete,Marco A. Janssen,Elinor Ostrom,2010-04-12 Advances in the social sciences have emerged through a variety of research methods field based research laboratory and field experiments and agent based models However which research method or approach is best suited to a particular inquiry is frequently debated and discussed Working Together examines how different methods have promoted various theoretical developments related to collective action and the commons and demonstrates the importance of cross fertilization involving multimethod research across traditional boundaries The authors look at why cross fertilization is difficult to achieve and they show ways to overcome these challenges through collaboration The authors provide numerous examples of collaborative multimethod research related to collective action and the commons They examine the pros and cons of case studies meta analyses large N field research experiments and modeling and empirically grounded agent based models and they consider how these methods contribute to research on collective action for the management of natural resources Using their findings the authors outline a revised theory of collective action that includes three elements individual decision making microsituational conditions and features of the broader social ecological context Acknowledging the academic incentives that influence and constrain how research is conducted Working Together reworks the theory of collective action and offers practical solutions for researchers

and students across a spectrum of disciplines **Manomin** Brittany Luby, Margaret Lehman, Andrea Bradford, Samantha Mehlretter, Jane Mariotti, 2024-11-07 Reclaiming crops and culture on Turtle Island Manomin more commonly known by its English misnomer wild rice is the only cereal grain native to Turtle Island North America Long central to Indigenous societies and diets this complex carbohydrate is seen by the Anishinaabeg as a gift from Creator a spirit berry that has allowed the Nation to flourish for generations Manomin Caring for Ecosystems and Each Other offers a community engaged analysis of the under studied grain weaving together the voices of scholars chefs harvesters engineers poets and artists to share the plant s many lessons about the living relationships between all forms of creation Grounded in Indigenous methodologies and rendered in full colour Manomin reveals and examines our interconnectedness through a variety of disciplines history food studies ethnobotany ecology and forms of expression including recipes stories and photos A powerful contribution to conversations on Indigenous food security and food sovereignty the collection explores historic uses of Manomin contemporary challenges to Indigenous aquaculture and future possibilities for restoring the sacred crop as a staple In our time of ecological crisis Manomin teaches us how to live well in the world sustaining our relations with each other our food and our waterways *Working Together* Amy R. Poteete, Marco Janssen, Elinor Ostrom, 2010-05-02 Advances in the social sciences have emerged through a variety of research methods field based research laboratory and field experiments and agent based models However which research method or approach is best suited to a particular inquiry is frequently debated and discussed Working Together examines how different methods have promoted various theoretical developments related to collective action and the commons and demonstrates the importance of cross fertilization involving multimethod research across traditional boundaries The authors look at why cross fertilization is difficult to achieve and they show ways to overcome these challenges through collaboration The authors provide numerous examples of collaborative multimethod research related to collective action and the commons They examine the pros and cons of case studies meta analyses large N field research experiments and modeling and empirically grounded agent based models and they consider how these methods contribute to research on collective action for the management of natural resources Using their findings the authors outline a revised theory of collective action that includes three elements individual decision making microsituational conditions and features of the broader social ecological context Acknowledging the academic incentives that influence and constrain how research is conducted Working Together reworks the theory of collective action and offers practical solutions for researchers and students across a spectrum of disciplines **Instructor's Manual for an Introduction to Methods and Models in Ecology** Stanton Braude, Bobbi S. Low, 2010-01-01 *Demographic Methods across the Tree of Life* Roberto Salguero-Gomez, Marlène Gamelon, 2021-08-31 Demography is everywhere in our lives from birth to death Indeed the universal currencies of survival development reproduction and recruitment shape the performance of all species from microbes to humans The number of techniques for demographic data acquisition and analyses across the entire tree of life

microbes fungi plants and animals has drastically increased in recent decades These developments have been partially facilitated by the advent of technologies such as GIS and drones as well as analytical methods including Bayesian statistics and high throughput molecular analyses However despite the universality of demography and the significant research potential that could emerge from unifying i questions across taxa ii data collection protocols and iii analytical tools demographic methods to date have remained taxonomically siloed and methodologically disintegrated This is the first book to attempt a truly unified approach to demography and population ecology in order to address a wide range of questions in ecology evolution and conservation biology across the entire spectrum of life This novel book provides the reader with the fundamentals of data collection model construction analyses and interpretation across a wide repertoire of demographic techniques and protocols It introduces the novice demographer to a broad range of demographic methods including abundance based models life tables matrix population models integral projection models integrated population models individual based models and more Through the careful integration of data collection methods analytical approaches and applications clearly guided throughout with fully reproducible R scripts the book provides an up to date and authoritative overview of the most popular and effective demographic tools Demographic Methods across the Tree of Life is aimed at graduate students and professional researchers in the fields of demography ecology animal behaviour genetics evolutionary biology mathematical biology and wildlife management
