Pidgins and Creoles in Asia Umberto Ansaldi, 2012-06-27 This book shifts the focus of Pidgin and Creole Studies from the better known Atlantic Caribbean contexts to the Indian Ocean the South China Sea and Mongolia By looking at Asian contexts before and after Western colonial expansion we offer readers insights into language contact in historical settings and with empirical features substantially different from those that have shaped the theory of the field Two pidgin varieties of the Far East are described in detail namely Chinese Pidgin Russian and China Coast Pidgin The former offers a unique opportunity to observe the typological dynamics of contact between Slavic Tungusic and Sinitic while the latter presents one of the better documented studies of any pidgin so far The third contribution is an in depth analysis of the Portuguese India slave trade in relation to contact phenomena The remaining two chapters look at Southeast Asia and discuss Malayo Portuguese Creoles and the ubiquitous Malay Sinitic lingua franca respectively From a linguistic perspective the diversity of language families the historical time depth the complex patterns of population movements and the wealth of contact phenomena that define Asia are so many and at times still so little understood that no single volume could ever pretend to shed sufficient light on all these aspects of the region Despite providing what can be seen as a sample platter of the field of contact linguistics in this part of the world the in depth analysis of exotic socio historical settings the typologically diverse and rich data sets and the notions of pidgins and Creoles as applied here will nonetheless stretch the limits and limitations of current theories in the field and are a must read for anyone interested in arriving at solid theoretical generalizations Published earlier as *Journal of Pidgin and Creole Linguistics* 25 1 2010

Modality□Aspect Interfaces Werner Abraham, Elisabeth Leiss, 2008-06-26 The main topics pursued in this volume are based on empirical insights derived from Germanic logical and typological dispositions about aspect modality links These are probed in a variety of non related languages The logically establishable links are the following Modal verbs are aspect sensitive in the selection of their infinitival complements embedded infinitival perfectivity implies root modal reading whereas embedded infinitival imperfectivity triggers epistemic readings However in marked contexts such as negated ones the aspectual affinities of modal verbs are neutralized or even subject to markedness inversion All of this suggests that languages that do not or only partially bestow upon full modal verb paradigms seek to express modal variations in terms of their aspect oppositions This typological tenet is investigated in a variety of languages from Indo European German Slavic Armenian African Asian Amerindian and Creoles Seeming deviations and idiosyncrasies in the interaction between aspect and modality turn out to be highly rule based The Genesis of Grammar Bernd Heine, Tania Kuteva, 2007-10-04 This book reconstructs what the earliest grammars might have been and shows how they could have led to the languages of modern humankind It considers whether these languages derive from a single ancestral language what the structure of language was when it first evolved and how the properties associated with modern human languages first arose
