Crossing Borders, Writing Texts, Being Evaluated Anne

Golden, Lars Anders Kulbrandstad, Lawrence Jun Zhang, 2021-12-14 This book provides critical perspectives on issues relating to writing norms and assessment as well as writing proficiency development and suggests that scholars need to both carefully examine testing regimes and develop research informed perspectives on tests and testing practices In this way schools institutions of adult education and universities can better prepare learners with differing cultural experiences to meet the challenges The book brings together empirical studies from diverse geographical contexts to address the crossing of literacy borders with a focus on academic genres and practices Most of the studies examine writing in countries where the norms and expectations are different but some focus on writing in a new discourse community set in a new discipline The chapters shed light on commonalities and differences between these two situations with respect to the expectations and evaluations facing the writers They also consider the extent to which the norms that the writers bring with them from their educational backgrounds and own cultures are compromised in order to succeed in the new educational settings

Craig, 2011 In this provocative book Carys Craig challenges the assumptions of possessive individualism embedded in modern day copyright law arguing that the dominant conception of copyright as private property fails to adequately reflect the realities of cultural creativity Employing both theoretical argument and doctrinal analysis including the novel use of feminist theory the author explores how the assumptions of modern copyright result in law that frequently restricts the kinds of expressive activities it ought to encourage In contrast Carys Craig proposes a relational theory of copyright based on a dialogic account of authorship and guided by the public interest in a vibrant participatory culture Through a critical examination of the doctrines of originality and fair dealing as well as the relationship between copyright and freedom of expression she explores how this relational theory of copyright law could further the public purposes of the copyright system and the social values it embodies This unique and insightful study will be of great interest to students and scholars of intellectual property communications cultural studies feminist theory and the arts and humanities
