

Autodesk Inventor Professional 2014

I'm such a CAD geek. There's not much that gives me greater pleasure than finding out what new tools are available in each release of Inventor. What really excites me about Inventor 2014 is the number of fixes, additions and changes that have been directly inspired by the feedback that you and I have been giving Autodesk. While it's hard to get a subdivision surface to be as accurate as a surface built using traditional sketches and surface features, subdivision surfacing is quick and intuitive. The biggest plus is that subdivision surfaces nicely feel, which makes complex part modelling a lot less prone to feature tree explosions.

T-Splines are an extremely clever addition to subdivision modelling that uses "T" points and "free points" to add detail (i.e. add faces and edges) in areas that require more refined surface curves. This is more efficient than regular Solid modelers, which need to subdivide the whole surface to add detail. Freeform bodies are non-parametric, but do exist in the feature tree. On entering the Freeform environment the T-Splines surface is smoothly converted to a "solid" body and further edits can be carried out using Inventor's regular solid and surface modelling tools.

Despite the fact that the Freeform environment opens whole new workflows for organic shape design in Inventor, I'm disappointed in how little of the original feature set from Rhino has been implemented.

Autodesk has already successfully implemented T-Splines into its flagship solid based CAD package — Fusion 360, so our appetite has been whetted with the possibilities Freeform T-Splines, in this current Inventor implementation, are restricted to closed bodies only — so no open surfaces. Freeforms can't be built from sketches and there is no "cage" view. Handy tools such as 'make uniform' and divide face by point are missing. What we do have is a functional set of tools that just about make Freeforms usable if you've never modelled with T-Splines before you'll get along with Freeform just fine. This introductory tool set is great for new users who need to learn this new way of thinking. Those of you who have been hammering out T-Splines in Fusion 360 for some time may feel a little hampered.

doing philosophy since a student can see exactly what the program shows and then step through progressive commands to implement the required operations Rather than using a verbal description of the command a screen capture of each command is replicated
