Alienation After Derrida Simon Skempton, 2011-10-20 Alienation After Derrida rearticulates the Hegelian Marxist theory of alienation in the light of Derrida's deconstruction of the metaphysics of presence Simon Skempton aims to demonstrate in what way Derridian deconstruction can itself be said to be a critique of alienation In so doing he argues that the acceptance of Derrida's deconstructive concepts does not necessarily entail the acceptance of his interpretations of Hegel and Marx In this way the book proposes radical reinterpretations not only of Hegel and Marx but of Derridian deconstruction itself The critique of the notions of alienation and de-alienation is a key component of Derridian deconstruction that has been largely neglected by scholars to date This important new study puts forward a unique and original argument that Derridian deconstruction can itself provide the basis for a rethinking of the concept of alienation a concept that has received little serious philosophically engaged attention for several decades

Alienation. Recuperating the Classical Discussion of Marx et al. Asger Sørensen, 2024-04-22 Nowadays alienation is naturally discussed as an existential condition of human beings but in the 20th century a strong Marxist current claimed alienation to be implied by capitalism in particular by private property and the social division of labor Alienation should therefore be criticized as part of the critique of capitalism and political economy and might therefore also possibly be overcome Today under the hegemony of neo liberal capitalism the basic logic of Marx's idea of alienation is more relevant than ever having as is argued in this book critical social as well as constructive pedagogical and political potential

, 2025-11-27 Why does Kierkegaard's thought remain vital in French philosophy and theology Kierkegaard in France traces the dynamic evolution of Kierkegaard's reception from the early 20th century to contemporary debates on faith ethics and individuality His influence on French thought is examined anew with regard to well known thinkers like Jean Paul Sartre Jacques Derrida and Paul Ricœur as well as readings that have largely been overlooked like those by Simone de Beauvoir and Vladimir Jankélévitch From existentialism and phenomenology to poststructuralism and feminism Kierkegaard continues to be an essential interlocutor in shaping the continental tradition of thought in France There is a natural affinity between Kierkegaard's uniquely intense subjectively involved metaphysical realism and the French spiritualist tradition which eschews both idealism and reductive empiricism This book brings out that affinity and displays it in all the variety of its manifestations both religious and secular both speculative and existentialist An indispensable and monumental entry for scholars and intriguing read for a wider audience Catherine Pickstock Norris Hulse Professor of Divinity University of Cambridge A Postphenomenological Inquiry of Cell Phones Galit Wellner, 2015-11-11 Why does the announcement of a

new cellphone model ignite excitement and passion Why do most people return home when they forget their cellphones while only few would return for their wallets How did the cellphone technology become so dominant for many of us This book offers an analysis of the historical evolution and of the meanings of this technology in the lives of billions of people The book offers a unique point of view on the cellphone that merges genealogical analysis of its development since the 1990s and philosophical insights into a coherent analytical framework With new concepts like histories of the future and memory prosthesis the book aims to explain the excitement arising from new model announcements and the ever growing dependency on the cellphone through the framing of these experiences in wide philosophical contexts It is the first philosophical analysis of the important roles the cellphone plays in contemporary everydayness [The Interface Envelope](#) James Ash, 2016-08-25 In *The Interface Envelope* James Ash develops a series of concepts to understand how digital interfaces work to shape the spatial and temporal perception of players Drawing upon examples from videogame design and work from post phenomenology speculative realism new materialism and media theory Ash argues that interfaces create envelopes or localised foldings of space time around which bodily and perceptual capacities are organised for the explicit production of economic profit Modifying and developing Bernard Stiegler's account of psychopower and Warren Neidich's account of neuropower Ash argues the aim of interface designers and publishers is the production of envelope power Envelope power refers to the ways that interfaces in games are designed to increase users perceptual and habitual capacities to sense difference Examining a range of examples from specific videogames Ash identifies a series of logics that are key to producing envelope power and shows how these logics have intensified over the last thirty years In turn Ash suggests that the logics of interface envelopes in videogames are spreading to other types of interface In doing so life becomes enveloped as the environments people inhabit becoming increasingly loaded with digital interfaces Rather than simply negative Ash develops a series of responses to the potential problematics of interface envelopes and envelope power and emphasizes their pharmacological nature
