Brown-Peterson Homology: An Introduction and Sampler W. Stephen Wilson, 1982-12-31 Presents discussion of formal groups and an introduction to BP homology This book features a section on unstable operations It is suitable for graduate students and algebraic topologists **Canadian Journal of Mathematics** ,1994 **Canadian Journal of Mathematics** ,1996-10 *Homotopy Theory via Algebraic Geometry and Group Representations* Mark E. Mahowald, 1998 The academic year 1996 97 was designated as a special year in Algebraic Topology at Northwestern University Evanston IL In addition to guest lecturers and special courses an international conference was held entitled Current trends in algebraic topology with applications to algebraic geometry and physics The series of plenary lectures included in this volume indicate the great breadth of the conference and the lively interaction that took place among various areas of mathematics Original research papers were submitted and all submissions were refereed to the usual journal standards Geometry Of Spherical Space Form Groups, The (Second Edition) Peter B Gilkey, 2018-01-04 This volume focuses on discussing the interplay between the analysis as exemplified by the eta invariant and other spectral invariants the number theory as exemplified by the relevant Dedekind sums and Rademacher reciprocity the algebraic topology as exemplified by the equivariant bordism groups K theory groups and connective K theory groups and the geometry of spherical space forms as exemplified by the Smith homomorphism These are used to study the existence of metrics of positive scalar curvature on spin manifolds of dimension at least 5 whose fundamental group is a spherical space form group This volume is a completely rewritten revision of the first edition The underlying organization is modified to provide a better organized and more coherent treatment of the material involved In addition approximately 100 pages have been added to study the existence of metrics of positive scalar curvature on spin manifolds of dimension at least 5 whose fundamental group is a spherical space form group We have chosen to focus on the geometric aspect of the theory rather than more abstract algebraic constructions like the assembly map and to restrict our attention to spherical space forms rather than more general and more complicated geometrical examples to avoid losing contact with the fundamental geometry which is involved **Notices of the American Mathematical Society** American Mathematical Society, 1983 Contains articles of significant interest to mathematicians including reports on current mathematical research **Publications of the Research Institute for Mathematical Sciences** ,1984 **Brown-Peterson Homology** W. Stephen Wilson, 1982 **The Homology of Hopf Spaces** R.M. Kane, 1988-08 This exposition of the theory of finite Hopf spaces details the development of the subject over the last thirty years with the homology of such spaces as its main theme The three chief areas of study in the volume are The study of finite H spaces with torsion free integral homology The study of finite H spaces with homology torsion The construction of finite H spaces **Regional Conference Series in Mathematics** ,1981
