Australia **Developing Creativity and Curiosity Outdoors** Julie Johnson, Ann Watts, 2018-06-18 This accessible guide will inform and prompt and inspire practitioners as they develop their own creativity and seize the rich opportunities offered by outdoor environments to cultivate and encourage the creative skills of the young children in their care. Including information on Forest School, *Developing Creativity and Curiosity Outdoors* builds on theories of creative learning and development and offers a wealth of ideas and activities for application in a range of outdoor settings. From designing and building structures to making music and exploring colour, shape and pattern, this book illustrates how engagement in and with the natural world might extend children's creative development, encouraging them to speak, listen, move, freely play and learn. Case studies demonstrate good practice and each chapter concludes with questions encouraging the reader to reflect on and develop their own practice. Practical ideas can be adapted for use in more urban environments and further reading, online resources and lists of suppliers make *Developing Creativity and Curiosity Outdoors* an essential resource for those looking to maximise the natural curiosity of children. This book will give early years practitioners and students the confidence and knowledge they need to embark on an exciting journey of outdoor discovery with young children. *Aesthetics of Weather* Madalina Diaconu, 2024-09-19 In an age of rife consumption and increasing need for consideration of sustainable social practices, an exploration of the aesthetics of weather from various angles becomes vital in shedding light on its importance to our experience of the changing world. In response, offering the first in-depth and nuanced examination of the aesthetics of weather, this book underlines the relevance the concept has for scientific communication, for fostering sustainable patterns of behaviour and for rejecting the environmentally damaging consumption of landscapes and fine weather. In addition, it provides examples taken from global contemporary popular culture whilst calling attention to the socioeconomic and political dimensions of individual experience, demonstrating and analysing our fascination with and cultural interpretations of weather phenomena in our everyday lives. Within its three sections, the volume reinvents traditional phenomenological methods to create socially, politically and historically embedded phenomenographies and explore the importance of aesthetic practices in shaping our experience of weather and climate. It also provides a deeper engagement with general topics such as the relationship between perception, emotion, imagination and cognition in our aesthetic experience of the weather, combining these with aesthetic analyses of the so-called fine weather. With its broad scope of inquiry ranging from Aristotle to eco-phenomenology, from the pioneers of scientific meteorology to contemporary art and from everyday aesthetics to geoengineering, this book argues that an aesthetics of weather, inflected by greater knowledge and the taking of a critical stance towards aestheticism, can become a valuable ally to climate ethics in the Anthropocene. **Philosophy of Time** Sean Enda Power, 2021-05-26 As a growing area of research, the philosophy of time is increasingly relevant to different areas of philosophy and even other disciplines. This book describes and evaluates the most important debates in philosophy of time under several subject areas: metaphysics, epistemology, physics, philosophy of language, philosophy of mind, cognitive science.

rationality and art Questions this book investigates include the following Can we know what time really is Is time possible especially given modern physics Must there be time because we cannot think without it What do we experience of time How might philosophy of time be relevant to understanding the mind body relationship or evidence in cognitive science Can the philosophy of time help us understand biases toward the future and the fear of death How is time relevant to art and is art relevant to philosophical debates about time Finally what exactly could time travel be And could time travel satisfy emotions such as nostalgia and regret Through asking such questions and showing how they might be best answered the book demonstrates the importance philosophy of time has in contemporary thought Each of the book s ten chapters begins with a helpful introduction and ends with study questions and an annotated list of further reading This and a comprehensive bibliography at the end of the book prepare the reader to go further in their study of the philosophy of time

Now Urbanism Jeffrey Hou, Benjamin Spencer, Thaisa Way, Ken Yocom, 2014-10-10 After more than a century of heroic urban visions urban dwellers today live in suburban subdivisions gated communities edge cities apartment towers and slums The contemporary cities we know are more often the embodiment of unexpected outcomes and unintended consequences rather than visionary planning As an alternative approach for rethinking and remaking today s cities and regions this book explores the intersections of critical inquiry and immediate substantive actions The contributions inside recognize the rich complexities of the present city not as barriers or obstacles but as grounds for uncovering opportunity and unleashing potential Now Urbanism asserts that the future city is already here It views city making as grounded in the imperfect messy yet rich reality of the existing city and the everyday purposeful agency of its dwellers Through a framework of situating grounding performing distributing instigating and enduring these contributions written by a multidisciplinary group of practitioners and scholars illustrate specificity context agency and networks of actors and actions in the re making of the contemporary city
