Investigating Political Tolerance at Conservative Protestant Colleges and Universities George Yancey, Laurel Shaler, Jerald H. Walz, 2019-02-21 This book aims to investigate the level of political tolerance at conservative Protestant colleges and universities Through innovative and methodologically sophisticated techniques the authors test the political openness of these institutions as a proxy for their willingness to accept opinions that fall outside of those held by their religious community The purpose of this study is to determine if there is an insular environment at conservative Protestant institutions beyond religious obligations or if these institutions are only restrictive as it concerns those theological commitments Drawing from five distinct sets of data the authors demonstrate that conservative Protestant institutions of higher education exhibit more political diversity and political tolerance than other institutions of higher education including elite Research 1 institutions

The Future of the Professions Richard E. Susskind, Daniel Susskind, 2015 This book predicts the decline of today's professions and describes the people and systems that will replace them In an Internet society according to Richard Susskind and Daniel Susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century The Future of the Professions explains how increasingly capable systems from telepresence to artificial intelligence will bring fundamental change in the way that the practical expertise of specialists is made available in society The authors challenge the grand bargain the arrangement that grants various monopolies to today's professionals They argue that our current professions are antiquated opaque and no longer affordable and that the expertise of their best is enjoyed only by a few In their place they propose six new models for producing and distributing expertise in society The book raises important practical and moral questions In an era when machines can outperform human beings at most tasks what are the prospects for employment who should own and control online expertise and what tasks should be reserved exclusively for people Based on the authors in depth research of more than ten professions and illustrated by numerous examples from each this is the first book to assess and question the relevance of the professions in the 21st century
