Introduction To Workplace Safety And Health Management: A Systems Thinking Approach (Third Edition) Yang Miang Goh, 2024-08-16

Workplace safety and health (WSH) is an important area of any business or organisation. A serious accident or ill health incident can cause much suffering and distress to workers, co-workers, and the victims' family and friends. In addition, the organisations involved in the WSH incident will have to manage negative consequences, including an increase in insurance premiums, lost time, and delays, morale issues, union and community protests, and reputation losses. On the other hand, good WSH can lead to organisational excellence. This book takes a systems thinking approach to allow readers to understand how WSH is an integral part of any organisation. The different chapters are strung together by an overarching model of incident causation, and underpinning models are presented to allow a strong conceptual foundation. Practical WSH knowledge is also discussed in relevant chapters to ensure that beginners have an introduction to the fundamentals of WSH hazards and controls. Besides the strong emphasis on conceptual framework, readers will also be exposed to the details of a WSH management system and practical WSH processes, hazards, and controls. This edition brings all ten of the book's chapters up to date with current day best practices, WSH guidelines, and approved codes of practice. A series of online quizzes are available to readers to help them to reinforce the concepts of each chapter. Undergraduates and postgraduates will benefit from the systematic introduction to the foundations of WSH management. Practitioners will strengthen their conceptual understanding and widen their perspective by re-visiting the foundations of WSH management through a systems thinking lens.

Systems Thinking in Europe R.B. Blackham, Robert L. Flood, Michael C. Jackson, G.J. Mansell, S.V.E. Probert, 2012-12-06

The theme of the conference at which the papers in this book were presented was Systems Thinking in Europe Members of the United Kingdom Systems Society UKSS were conscious that the systems movement flourishes not only in the UK America and the Antipodes but also in continental Europe both East and West and in the USSR a nation increasingly being welcomed by the European Community Membership of the UKSS had not perhaps had the opportunity however of hearing important new ideas from continental Europe and this conference provided an opportunity to do so Some interesting papers are to be found here from both the West and the East if the editors may be forgiven for perpetuating what may be an increasingly irrelevant dichotomy One lesson to be learned from this conference though is that systems thinking is truly international This is not to say that there is one systems paradigm uniformly applied however Perhaps the core of systems thinking is that one is interested in complex wholes with emergent properties to which cybernetic ideas can be applied Examples of such systems thinking can be found in these proceedings for example in the section entitled Applications of Systems Thinking Attempts to bring about change with these ideas however have given rise to a diversity of approaches as is evidenced by the papers dealing with the application of methodologies in the hard and soft systems traditions

Mastering Motivation Damian Inc. Hamill, 2012-08 Conventionally motivation is thought of as something that is created by exciting pep talks or by the promise of material rewards More recent research suggests however that such approaches may have the opposite effect of what was intended and that there is no one size fits all approach to motivation In this eBook Damian Hamill takes an NLP systemic approach to motivation and presents a model that suggests motivation emerges when we are aligned with whatever it is we are seeking to achieve A lack of motivation he suggests may be a very useful way of communicating that what we are planning to do conflicts with something that is important to us Damian guides the listener through a process to explore appreciate and if appropriate resolve such conflicts enabling a greater degree of motivation to naturally evolve as a result
