Freight Transport and the

Modern Economy Michel Savy, June Burnham, 2013-06-26 Freight Transport and the Modern Economy adapts a well known textbook by Michel Savy revising extending and updating it for British European and international readers It deals not only with the technical aspects of transport logistics and supply chain management but also the interactions between transport professionals and the public authorities in the modern social political economic and environmental context The transport of freight is presented as a system mixing empirics and theory showing how transport itself functions and also its strong influence on the modern economy with a growing volume of production turnover and employment The nature of freight transport an industrial process widely marketed as a service is analysed in depth explaining the main characteristics of the transport operation its market and the regulatory context The main actors the professional actors carriers shippers and other agents and the public authorities are introduced and their behaviour and interactions are clarified This comprehensive approach allows the reader to go further and consider in particular the approaches and practices of transport by carriers customers logistics managers political decision makers and citizens to tackle long range issues such as the decoupling of production and transport recommended by some institutions and experts and to explore the need for more infrastructure or the capacity of the freight transport industry to reduce its contribution to pollution and climate change This book treats freight transport as a whole system in its technical economic social political and environmental context in contrast to existing transport literature focused on individual aspects such as transportation planning usually for cars or passengers logistics essentially management issues or individual transport modes This book is comprehensive in its treatment of freight transport and in its use of multiple disciplinary perspectives

Connecting Places, Connecting People Reena Tiwari, 2017-09-07 What is a better community How can we reconfigure places and transport networks to create environmentally friendly economically sound and socially just communities How can we meet the challenges of growing pollution depleting fossil fuels rising gasoline prices traffic congestion traffic fatalities increased prevalence of obesity and lack of social inclusion The era of car based planning has led to the disconnection of people and place in developed countries and is rapidly doing so in the developing countries of the Global South The unfolding mega trend in technological innovation while adding new patterns of future living and mobility in the cities will question the relevance of face to face connections What will be the glue that holds communities together in the future To build better communities and to build better cities we need to reconnect people and places *Connecting Places Connecting People* offers a new paradigm for place making by reordering urban planning principles from prioritizing movement of vehicles to focusing on places and the people who live in them Numerous case studies including many from developing countries in the Global South illustrate how this can be realized or fallen short of in practical terms Importantly citizens need to be engaged in policy development to connect with each other and with government agencies To measure the connectivity attributes of places and the success of strategies to meet the needs an Audit Tool is offered for a continual quantitative and qualitative evaluation
