By bringing to light many unresearched dimensions of the twelfth century Cambodian temple of Angkor Wat during its modern history the study argues for a conceptual connected history that unfolded within the transcultural interstices of European and Asian projects. With more than 1 400 black and white and colour illustrations of historic photographs architectural plans and samples of public media the monograph discusses the multiple lives of Angkor Wat over a 150 year long period from the 1860s to the 2010s. Volume 1 Angkor in France reconceptualises the Orientalist French colonial discovery of the temple in the nineteenth century and brings to light the manifold strategies at play in its physical representations as plaster cast substitutes in museums and as hybrid pavilions in universal and colonial exhibitions in Marseille and Paris from 1867 to 1937. Volume 2 Angkor in Cambodia covers for the first time in this depth the various on site restoration efforts inside the Archaeological Park of Angkor from 1907 until 1970 and the temple's gradual canonisation as a symbol of national identity during Cambodia's troublesome decolonisation 1953-89 from independence to Khmer Rouge terror and Vietnamese occupation and finally as a global icon of UNESCO World Heritage since 1992 until today. Congratulations to our author Michael Falser who received the prestigious 2021 ICAS Book Prize in the Ground Breaking Subject Matter category. *World Architecture* Richard Ingersoll, 2019 World Architecture provides the most comprehensive and contemporary survey of the field. Each chapter is organized chronologically and focuses on three unique architectural cultures simultaneously providing instructors with flexibility and offering students a comprehensive method for understanding and appreciating the history cultural significance beauty and diversity of architecture from around the world. **A Heritage of Ruins** William R. Chapman, 2013-07-31 The ancient ruins of Southeast Asia have long sparked curiosity and romance in the world's imagination. They appear in accounts of nineteenth century French explorers as props for Indiana Jones adventures and more recently as the scene of Lady Lara Croft's fantastical battle with the forces of evil. They have been featured in National Geographic magazine and serve as backdrops for popular television travel and reality shows. Now William Chapman's expansive new study explores the varied roles these monumental remains have played in the histories of Southeast Asia's modern nations. Based on more than fifteen

years of travel research and visits to hundreds of ancient sites A Heritage of Ruins shows the close connection between ruins conservation and both colonialism and nation building It also demonstrates the profound impact of European derived ideas of historic and aesthetic significance on ancient ruins and how these continue to color the management and presentation of sites in Southeast Asia today Angkor Pagan Bagan Borobudur and Ayutthaya lie at the center of this cultural and architectural tour but less visited sites including Laos s stunning Vat Phu the small temple platforms of Malaysia s Lembah Bujang Valley the candi of the Dieng Plateau in Java and the ruins of Mingun in Burma and Wiang Kum Kam near Chiang Mai in northern Thailand are also discussed All share a relative isolation from modern urban centers of population sitting in park like settings serving as objects of tourism and as lynchpins for local and even national economies Chapman argues that these sites also remain important to surrounding residents both as a means of income and as continuing sources of spiritual meaning He examines the complexities of heritage efforts in the context of present day expectations by focusing on the roles of both outside and indigenous experts in conservation and management and on attempts by local populations to reclaim their patrimony and play a larger role in protection and interpretation Tracing the history of interventions aimed at halting time s decay Chapman provides a chronicle of conservation efforts over a century and a half highlighting the significant part foreign expertise has played in the region and the ways that national programs have in recent years begun to break from earlier models The book ends with suggestions for how Southeast Asian managers and officials might best protect their incomparable heritage of art and architecture and how this legacy might be preserved for future generations
