Peña-Guzmán, 2023-09-26 A spellbinding look at the philosophical and moral implications of animal dreaming Are humans the only dreamers on Earth What goes on in the minds of animals when they sleep *When Animals Dream* brings together behavioral and neuroscientific research on animal sleep with philosophical theories of dreaming It shows that dreams provide an invaluable window into the cognitive and emotional lives of nonhuman animals giving us access to a seemingly inaccessible realm of animal experience David Peña Guzmán uncovers evidence of animal dreaming throughout the scientific literature suggesting that many animals run reality simulations while asleep with a dream ego moving through a dynamic and coherent dreamscape He builds a convincing case for animals as conscious beings and examines the thorny scientific philosophical and ethical questions it raises Once we accept that animals dream we incur a host of moral obligations and have no choice but to rethink our views about who animals are and the interior lives they lead A mesmerizing journey into the

otherworldly domain of nonhuman consciousness When *Animals Dream* carries profound implications for contemporary debates about animal cognition animal ethics and animal rights challenging us to regard animals as beings who matter and for whom things matter

Victorian Animal Dreams Deborah Denenholz Morse, Martin A. Danahay, 2017-05-15 The Victorian period witnessed the beginning of a debate on the status of animals that continues today This volume explicitly acknowledges the way twenty first century deliberations about animal rights and the fact of past and prospective animal extinction haunt the discussion of the Victorians obsession with animals Combining close attention to historical detail with a sophisticated analytical framework the contributors examine the various forms of human dominion over animals including imaginative possession of animals in the realms of fiction performance and the visual arts as well as physical control as manifest in hunting killing vivisection and zookeeping The diverse range of topics analyzed from a contemporary perspective makes the volume a significant contribution to Victorian studies The conclusion by Harriet Ritvo the pre eminent authority in the field of Victorian animal

studies provides valuable insight into the burgeoning field of animal studies and points toward future studies of animals in the Victorian period **Knowing Animals** Laurence Simmons, Philip Armstrong, 2007 Drawing on a range of perspectives philosophy literary criticism art history and cultural studies the essays collected here explore unconventional ways of knowing animals offering new insights into apparently familiar relationships between humans and other living beings

Sleep and Dreaming Edward F. Pace-Schott, 2003-02-27 How and why does the sleeping brain generate dreams Though the question is old a paradigm shift is now occurring in the science of sleep and dreaming that is making room for new answers From brainstem based models of sleep cycle control research is moving toward combined brainstem forebrain models of sleep cognition itself The book presents five papers by leading scientists at the center of the current firmament and more than seventy five commentaries on those papers by nearly all of the other leading authorities in the field Topics include mechanisms of dreaming and REM sleep memory consolidation in REM sleep and an evolutionary hypothesis of the function of dreaming The papers and commentaries together with the authors rejoinders represent a huge leap forward in our understanding of the sleeping and dreaming brain The book s multidisciplinary perspective will appeal to students and researchers in neuroscience cognitive science and psychology **Companion Animals and Us** Anthony L.

Podberscek, Elizabeth S. Paul, James A. Serpell, 2005-07-21 Over the past 30 years there has been a tremendous growth in interest in the multidisciplinary field of human companion animal interactions and relationships This is not surprising considering that pets are kept in at least half of the households in Western societies What then is so special about the relationships people have with their pets Are we very different from our ancestors in the ways we feel about animals What does pet keeping tell us about ourselves and our relationships with people Can pets be good for our health Do they help promote empathy for other humans These questions and more are explored in this book Companion Animals and Us brings together some of the newest research from a wide variety of disciplines including anthropology history psychology sociology human and veterinary medicine This book will make fascinating reading for anyone interested in understanding more about the human pet relationship
