Ethical and Political Approaches to Nonhuman Animal Issues Andrew Woodhall,Gabriel Garmendia da Trindade,2017-08-28 This book offers ethical and political approaches to issues that nonhuman animals face The recent political turn in interspecies ethics from ethical to political approaches has arisen due to the apparent lack of success of the nonhuman animal movement and dissatisfaction with traditional approaches Current works largely present general positions rather than address specific issues and principally rely on mainstream approaches This book offers alternative positions such as cosmopolitan libertarian and left humanist thought as well as applying ethical and political thought to specific issues such as experimentation factory farming nonhuman political agency and intervention Presenting work by theorists and activists insights are offered from both ethics and politics that impact theory and practice and offer essential considerations for those engaging in interspecies ethics within the political turn era

Sea Otters Richard Ravalli,2021-06 An examination of sea otters in a Pacific World context and an exploration of how this iconic sea mammal once defined the world s largest oceanscape

Towards a Vegan Jurisprudence Jeanette Rowley,2020-10-05 Towards a Vegan Jurisprudence The Need for a Reorientation of Human Rightsargues that in order to give effect to animal rights human society is obliged to question the extent to which our social norms permit us to manifest compassionate justice to other animals Jeanette Rowley posits a new perspective on the theory and practice of human rights to accommodate the demands of vegans for rights for nonhuman animals recognizing the existing argument that the idea grounding human rights is our ethical responsibility to the precarious mortal other Rowley

develops this principle to ground the rights claims of vegans in the ethics of alterity applying the concept to nonhuman others to ground the protection of other animals and provide a new approach to human rights litigation to accommodate vegans calling for the reconceptualization of the very idea of human rights

Wild Animals and Leisure Neil Carr, Janette Young, 2018-03-05 Wild animals form an integral component of the human leisure experience They are a significant part of the leisure industry and are economically valuable entities However as sentient beings animals also have rights and welfare needs and like humans may also have their own leisure desires and requirements This collection provides an in depth analysis of the rights and welfare of humans and wild animals as the two relate to one another within the sphere of leisure studies It examines a wide array of animals such as wolves elephants dolphins and apes in a diverse range of leisure settings in international locations from captive wild animals in zoos hunting swimming with dolphins and animals used as educators and for tourist entertainment This book provides a forum for future considerations of wild animals and leisure and a voice for animal welfarist agendas that seek to improve the conditions under which wild animals interact with and are engaged with by humans

Supergenes Craig MacKay, 2007-12-19 Why do we behave so differently in different situations Why did you choose the clothes you are wearing the books you read and the friends and opinions you have What is it about humans that has let us achieve so much so quickly This book tries to understand why the evolution of our human species is happening at a rate so much faster than may be explained by Darwinian biological evolution alone The engine of our extraordinary social evolution is human behaviour We have a deep seated need to pass on to others some part of our own achievements what we have made of our lives Our survival and success now depends principally on our adaption to our social environment and not to our physical environment It is these supercharged social genes that are the essence of our remarkable and accelerating rate of evolution today This book looks critically at our present understanding of human behaviour and evolution to seek a consilience across a wide range of fields of research More at www.supergenes.net

Plant Disturbance Ecology Edward A. Johnson, Kiyoko Miyanishi, 2020-10-21 Disturbance ecology continues to be an active area of research having undergone advances in many areas in recent years One emerging direction is the increased coupling of physical and ecological processes in which disturbances are increasingly traced back to mechanisms that cause the disturbances themselves such as earth surface processes mesoscale and larger meteorological processes and the ecological effects of interest are increasingly physiological Plant Disturbance Ecology 2nd Edition encourages movement away from the informal conceptual approach traditionally used in defining natural disturbances and clearly presents how scientists can use a multitude of approaches in plant disturbance ecology This edition includes nine revised chapters from the first edition as well new more comprehensive chapters on fire disturbance and beaver disturbance Edited by leading experts in the field Plant Disturbance Ecology 2nd Edition is an essential resource for scientists interested in understanding plant disturbance and ecological processes Advances understanding of natural disturbances by combining geophysical and ecological processes Provides a framework

for collaboration between geophysical scientists and ecologists studying natural disturbances Includes fully updated research with 5 new chapters and revision of 11 chapters from the first edition *Intervention or Protest* Gabriel Garmendia da Trindade, Andrew Woodhall, 2020-10-06 Within current political social and ethical debates both in academia and society activism and how individuals should approach issues facing nonhuman animals have become increasingly important hot issues Individuals groups advocacy agencies and governments have all espoused competing ideas for how we should approach nonhuman use and exploitation Ought we proceed through liberation Abolition Segregation Integration As nonhuman liberation welfare and rights groups increasingly interconnect and identify with other social justice movements resolutions to these questions have become increasingly entangled with questions of what justice and our ethical commitments demand on this issue and the topic has become increasingly significant and divisive The book considers how this question and contemporary issues facing nonhumans such as experimentation hunting and factory farming should be answered by drawing on both theory and practice in order to provide grounded yet actionable ways forward Indicatively the book covers topics such as The intersection between nonhuman ethics and the ethics of war and self defence Nonhuman animals as political subjects and acting agents Whether we should intervene for nonhuman animals in cases of natural disaster Various explorations of why the nonhuman movement may not be succeeding as well as it could be Comparisons between the nonhuman movement and other social movement Arguments for and against intervening to help or save nonhumans and how far we may go What intervention could ultimately mean for nonhumans The book is therefore intended not only to provide new and interesting insight into the area and important contemporary discussions but also to constructively aid the nonhuman movement and unite theory and practice on the crucial issues With the nonhuman movement and its past approaches currently being questioned as a success more nonhumans than ever being harmed and exploited and a growing gulf between activists and scholars this book will not only be a timely addition to the literature but an attempt to bridge these gaps and move both theory and practice and thus the movement and field forward
