Margo DeMello offers students and scholars a holistic and comprehensive picture of the state of inquiry into the relationships that exist between humans and other animals. She considers interactions between animals and humans in social organizations such as the family, the legal system, and political and religious institutions. A major focus is the social construction of animals in world cultures and the way in which these social meanings are used to reinforce and perpetuate hierarchical human relationships such as racism, sexism, and class privilege. The book also examines how different human groups construct a range of identities for themselves and for others through animals. This second edition of *Animals and Society* is fully updated and expanded throughout, enhancing the book's relevance for student and activist readers alike. It includes many new international examples, all new case studies, and updated supplementary readings.

The Oxford Handbook of Animal Studies Linda Kalof, 2017-02-01 Intellectual struggles with the animal question: how humans can rethink and reconfigure their relationships with other animals first began to take hold in the 1970s. Over the next forty years, scholars from a wide range of fields would make sweeping reevaluations of the relationship between humans and other animals. The Oxford Handbook of Animal Studies brings these diverse evaluations together for the first time, paying special attention to the commodification of animals, the degradation of the natural world, and a staggering loss of animal habitat and species extinction, and the increasing need for humans to coexist with other animals in urban, rural, and natural contexts. Linda Kalof maps these themes into the five major categories that structure this volume: Animals in the Landscape of Law, Politics, and Public Policy; Animal Intentionality, Agency, and Reflexive Thinking; Animals as Objects in Science, Food, Spectacle, and Sport; Animals in Cultural Representations; and Animals in Ecosystems. Written by international scholars with backgrounds in philosophy, law, history, English, art, sociology, geography, archaeology, environmental studies, cultural studies, and animal advocacy, the thirty chapters in this handbook investigate key issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings.

Professionals in food chains Svenja Springer, Herwig Grimm, 2023-08-07 Within the public debate surrounding food, people often contend that the key to meeting current challenges is changing consumer behaviour. Professionals and practitioners such as farmers, retailers, veterinarians, or researchers only occupy the limelight during media coverage of so-called food scandals. If we are to better understand and negotiate current and future problems in the food supply chain, it will be essential to pay more attention to the role and position of professionals involved. *Professionals in food chains* addresses questions such as: What are the main ethical challenges for professionals in the food supply chain? Who within this complex field holds responsibility for what? What does it mean for the food-related professions to operate in an atmosphere of immense social tension and high expectations? Which virtues are required to do a good job? In brief: What can be said about the roles, responsibilities, and ethics of professionals across this dynamic field? This book brings together work by scholars from a wide range of disciplines, addressing a broad spectrum of topics pertaining to professionals in the food supply chain. Topics covered
