Animation in China Sean Macdonald, 2015-11-06 By the turn of the 21st century animation production has grown to thousands of hours a year in the People's Republic of China PRC Despite this and unlike American blockbuster productions and the diverse genres of Japanese anime much animation from the PRC remains relatively unknown This book is an historical and theoretical study of animation in the PRC Although the Wan Brothers produced the first feature length animated film in 1941 the industry as we know it today truly began in the 1950s at the Shanghai Animation Film Studio SAFS which remained the sole animation studio until the 1980s Considering animation in China as a convergence of the institutions of education fine arts literature popular culture and film the book takes comparative approaches that link SAFS animation to contemporary cultural production including American and Japanese animation Pop Art and mass media theory Through readings of classic films such as Princess Iron Fan Uproar in Heaven Princess Peacock and Nezha Conquers the Dragon King this study represents a revisionist history of animation in the PRC as a form of postmodernism with Chinese characteristics As a theoretical exploration of animation in the People's Republic of China this book will appeal greatly to students and scholars of animation film studies Chinese studies cultural studies political and cultural theory [Chinese Animation and Socialism](#) , 2021-10-05 Please visit our blog to read an interview with Daisy Yan Du This volume on Chinese animation and socialism is the first in English that introduces the insider viewpoints of socialist animators at the Shanghai Animation Film Studio in China Although a few monographs have been published in English on Chinese animation they are from the perspective of scholars rather than of the animators who personally worked on the films as discussed in this volume Featuring hidden histories and names behind the scenes precious photos and commentary on rarely seen animated films this book is a timely and useful reference book for researchers students animators and fans interested in Chinese and even world animation This book originated from the Animators Roundtable Forum April 2017 at the Hong Kong University of Science and Technology organized by the Association for Chinese Animation Studies *Proceedings of the 3rd International Conference on Creative Multimedia 2023 (ICCM 2023)* Fauzan Mustaffa, 2023-11-14 This is an open access book The Faculty of Creative Multimedia FCM Multimedia University will hold the 3rd International Conference on Creative Multimedia 2023 ICCM2023 on 26-28 July 2023 Virtual Conference ICCM2023 invites prospective authors to take part by submitting research papers in pursuing the vibrant discourse of creative multimedia ICCM2023 aims to bring together related research scholars educators practitioners policymakers enthusiasts fellow students and design entrepreneurs from various perspectives disciplines and fields to share and exchange their research experiences and results on all aspects of arts design and creative media technologies ICCM2023 embraces possibilities provides an interdisciplinary forum for all stakeholders to present and discuss current trends innovations and concerns as well as practical issues and solutions in the field of creative multimedia We welcome high quality research contributions dealing with original and unpublished results on fundamental conceptual

The Crafty Animator Caroline Ruddell, Paul Ward, 2019-04-03 This collection is a study of the value of craft as it can be understood within the study and practice of animation The book reconsiders the position of craft which is often understood as inferior to art with a particular focus on questions of labour in animation production and gendered practices The notion of craft has been widely investigated in a number of areas including art design and textiles but despite the fact that a wide range of animators use craft based techniques the value of craft has not been interrogated in this context until now Seeking to address such a gap in the literature this collection considers the concept of craft through a range of varying case studies Chapters include studies on experimental animation computer animation trauma and memory children's animation and silhouette animation among others The Crafty Animator also goes some way to exploring the relationship craft has with the digital in the context of animation production Through these varied discussions this book problematizes simplistic notions about the value of certain methods and techniques working to create a dialogue between craft and animation

Chinese Independent Animation Wenhai Zhou, 2020-04-23 This study of independent animation opens up a quietly subversive and vibrant dimension of contemporary Chinese culture which hitherto has not received as much attention as dissident art or political activism Scholarly interest in Chinese animation has increased over the last decade with attention paid to the conventional media circle of production distribution and consumption The independent sector has been largely ignored however until now By focusing on distinctive independent artists like Pisan and Lei Lei and situating their work within the present day media ecology the author examines the relationship between the genre and the sociocultural transformation of contemporary China Animation the author argues has a special significance as the nature of the animation text is itself multilayered and given to multiple interpretations and avenues of engagement Through an examination of the affordances of this independent media

entity the author explores how this multifaceted cultural form reveals ambiguities that parallel contradictions in art and society In so doing independent animation provides a convenient mirror for examining how recent social upheavals have been negotiated and how certain practitioners have found effective ways for discussing the post Socialist reality within the current political configuration
