Anooshahr, 2018-04-02 It has long been known that the origins of the early modern dynasties of the Ottomans Safavids Mughals Mongols and Shibanids in the sixteenth century go back to Turco Mongol or Turcophone war bands However too often has this connection been taken at face value usually along the lines of ethno linguistic continuity *Turkestan and the Rise of Eurasian Empires* argues that the connection between a mythologized Turkestani or Turco Mongol origin and these dynasties was not simply and objectively present as fact Rather much creative energy was unleashed by courtiers and leaders

from Bosnia to Bihar with Bukhara and Badakhshan along the way in order to manipulate and invent the ancestry of the founders of these dynasties Through constructed genealogies nascent empires founded on disorganized military and political events were reduced to clear and stable categories With proper family trees in place and their power legitimized leaders became far removed from their true identities as bands of armed men and transformed into warrior kings This created a longstanding pattern of false histories created by the intellectuals of the day Essentially one can even say that Turco Mongol progenitors did not beget the Ottoman Safavid Mughal Mongol and Shibanid states Quite the contrary one can instead say that historians writing in these empires were the ancestors of the Turco Mongol lineage of their founders Using one or more specimens of Persian historiography in a series of five case studies each focusing on one of these early polities Ali Anooshahr shows how Turkestan Central Asia or Turco Mongol functioned as literary tropes in the political discourse of the time

The Oxford Handbook of Early Modern European History, 1350-1750 Hamish M. Scott, 2015 This Handbook re-examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume II is devoted to Cultures and Power opening with chapters on philosophy science art and architecture music and the Enlightenment Subsequent sections examine Europe beyond Europe with the transformation of contact with other continents during the first global age and military and political developments notably the expansion of state power
