Archaeology Under Dictatorship:

Archaeology Under Dictatorship Michael L. Galaty, Charles Watkinson, 2007-03-14 Archaeological knowledge is not created in a vacuum and our understanding of the past is profoundly affected by political ideologies. In fact, a relationship between politics and archaeology develops to some degree in every nation regardless of social and economic circumstances. The connections between politics and archaeology become most visible however within a totalitarian dictatorship when a dictator seeks to create and legitimize new state supported ideologies. Any dictator may attempt to control and exploit the past often by directly controlling archaeologists. The degree to which a nation's archaeological system may continue to be affected after the fall of the dictator depends upon both the previous regime's ideological position and its level of dependence upon archaeology and the response of archaeologists to the regime collectively and individually. Archaeology Under Dictatorship demonstrates that the study of archaeology as it evolved under modern dictatorships is today more than ever of critical importance. For example, in many European countries those who practiced archaeology under dictatorship are retiring or dying. In some places their intellectual legacy is being pursued uncritically by a younger generation of archaeologists. Now is the time therefore to understand how archaeologists have supported and sometimes subverted dictatorial political ideologies. In studying archaeology as practiced under totalitarian dictatorship, that most harsh of political systems, light is shed on the issue of politics and archaeology generally. This volume aims to provide a theoretical basis for understanding the specific effects of totalitarian dictatorship upon the practice of archaeology both during and after the dictator's reign. The nine essays explore experiences from every corner of the Mediterranean from the heartlands of Italy, Spain, and Greece to the less well known shores of Albania and Libya. With its wide range of case studies and strong theoretical orientation, this volume is a major advance in the study of the history and politics of archaeology. The Mediterranean focus will also make it thought provoking reading for classical archaeologists and historians.

National-Socialist Archaeology in Europe and its Legacies Martijn Eickhoff, Daniel Modl, Katie Meheux, Erwin Nuijten, 2023-08-14 This edited volume is dedicated to national socialist archaeology as a Europe-wide phenomenon. It analyses national socialist attempts to denationalize the archaeologies of European nations by creating a new unifying European archaeology on a racial basis. From the beginning of the nineteenth century, archaeology began to develop into an important force behind processes of nation building. At the same time, structures of transnational academic collaboration contributed strongly to the internal dynamics of the research field which was primarily organized on a national basis. In those European countries that were confronted with

national socialist occupation and repression between 1939 and 1945 these transnational archaeological networks were to prove crucial for the development of national socialist archaeological policies This volume will reveal how national socialist archaeology was to an extent valued positively in its time as highly innovative even influencing the archaeology of non occupied countries Although in the final instance it generally failed to displace the national archaeologies in Europe the volume also analyses the long term impact of national socialist rule on the development of European archaeology How did the attempts to create a unified European archaeology after 1945 continue to influence networks methods and terminologies institutional structures or popular representations of the early past Chapter 1 Is available open access under a Creative Commons Attribution 4.0 International License via Springerlink
