Arcpad 8 User Guide:

ARC User ,2009 **Community Forest Monitoring for the Carbon Market** Margaret Skutsch,2012-08-06 Recent developments in international policy on Reduced Emissions from Deforestation in Developing countries REDD open the way for crediting of carbon saved by rural communities through management of the forests in their vicinity Since the annual changes in forest carbon stock under this kind of management are relatively small and often under the canopy they cannot easily be assessed using remote sensing so ground level data collection is likely to be essential over large areas of forests The potential role of communities in measuring monitoring and reporting carbon stock changes in their forests has been explicitly mentioned in UNFCCC documentation on methodology for REDD the extended form of REDD that includes forest enhancement sustainable forest management and forest conservation This book presents practical methods by which communities can do it These methods were developed and tested with communities in villages in Africa and Asia under a six year research programme The reliability of the data gathered by the community is shown to be equivalent to that of professional forest inventories while the costs are much lower Involvement of local communities in collection of this data may be the most cost effective solution for national REDD programmes Moreover it could provide the basis for a transparent system for distribution of the financial rewards from REDD and the carbon market The book first presents the policy context concepts methods and general results which include estimates of typical carbon savings resulting from community management in different types of tropical forests It also looks at the governance issues that may be involved and a variety of ways in which incentive schemes might be designed to encourage communities to participate The second half of the book is devoted to case studies from the countries involved in the research These provide both ideas and practical experience to enable agencies to engage with local communities to monitor carbon stock changes Geographic Information Systems (GIS) for Disaster Management Brian Tomaszewski,2014-12-19 Geographic Information Systems GIS provide essential disaster management decision support and analytical capabilities As such homeland security professionals would greatly benefit from an interdisciplinary understanding of GIS and how GIS relates to disaster management policy and practice Assuming no prior knowledge in GIS and or disaster management Geographic Information Systems GIS for Disaster Management guides readers through the basics of GIS as it applies to disaster management practice Using a hands on approach grounded in relevant GIS and disaster management theory and practice this textbook provides coverage of the basics of GIS It examines what GIS can and can t do GIS data formats vector raster imagery and basic GIS functions including analysis map production cartography and data modeling It presents a series of real life case studies that illustrate the GIS concepts discussed in each chapter These case studies supply readers with an understanding of the applicability of GIS to the full disaster management cycle Providing equal treatment to each disaster management cycle phase the book supplies disaster management practitioners and students with coverage of the latest developments in GIS for disaster

management and emerging trends It takes a learning by examples approach to help readers apply what they have learned from the examples and disaster management scenarios to their specific situations The book illustrates how GIS technology can help disaster management professionals public policy makers and decision makers at the town county state federal and international levels Offering software neutral best practices this book is suitable for use in undergraduate or graduate level disaster management courses Offering extensive career advice on GIS for disaster management from working professionals the book also includes a GIS for disaster management research agenda and ideas for staying current in the field

International Encyclopedia of Human Geography ,2009-07-16 The International Encyclopedia of Human Geography provides an authoritative and comprehensive source of information on the discipline of human geography and its constituent and related subject areas The encyclopedia includes over 1 000 detailed entries on philosophy and theory key concepts methods and practices biographies of notable geographers and geographical thought and praxis in different parts of the world This groundbreaking project covers every field of human geography and the discipline s relationships to other disciplines and is global in scope involving an international set of contributors Given its broad inclusive scope and unique online accessibility it is anticipated that the International Encyclopedia of Human Geography will become the major reference work for the discipline over the coming decades The Encyclopedia will be available in both limited edition print and online via ScienceDirect featuring extensive browsing searching and internal cross referencing between articles in the work plus dynamic linking to journal articles and abstract databases making navigation flexible and easy For more information pricing options and availability visit http://info.sciencedirect.com/content/books/ref_works/coming Available online on ScienceDirect and in limited edition print format Broad interdisciplinary coverage across human geography Philosophy Methods People Social Cultural Political Economic Development Health Cartography Urban Historical Regional Comprehensive and unique the first of its kind in human geography
