and Construction Behaviour

CAMBRIDGE

Bird Nests And Construction Behaviour

Alan B. Bond, Judy Diamond

Bird Nests And Construction Behaviour:

Bird Nests and Construction Behaviour Mike Hansell, 2000-08-31 *Bird Nests and Construction Behaviour* provides a broad view of our understanding of the biology of the nests bowers and tools made by birds It illustrates how among vertebrates the building abilities of birds are more impressive and consistent than for any other builders other than ourselves yet birds seem to require no special equipment and use quite uncomplicated behaviour In doing so the book raises general issues in the field of behavioural ecology including the costs of reproduction sexual selection and the organisation and complexity of behaviour Written for students and researchers of animal behaviour behavioural ecology and ornithology it will nevertheless make fascinating reading for architects and engineers interested in understanding how structures are created by animals

Bird Nests and Construction Behaviour Michael Henry Hansell, 2000 **Peterson Field Guide to North American Bird Nests** Casey McFarland, Matthew Monjello, David Moskowitz, 2021 A comprehensive field guide to the nests and nesting behavior of North American birds Beyond being a simple reference book the Peterson Field Guide to North American Bird Nests is a practical educational and intimate doorway to our continent's bird life The diversity of nests and nesting strategies of birds reflect the unique biology and evolution of these charismatic animals Unlike any other book currently on the market this guide comprehensively incorporates nest design breeding behavior and habitat preferences of North American birds to provide the reader with a highly functional field resource and an engaging perspective of this sensitive part of a bird's life cycle

When Brains Meet Buildings Michael A. Arbib, 2021-08-17 Michael Arbib presents *When Brains Meet Buildings* as an invitation to the science behind architecture richly illustrated with buildings both famous and domestic As he converses with the reader he presents action oriented perception memory and imagination as well as atmosphere aesthetics and emotion as keys to analyzing the experience and design of architecture

Avian Cognition Carel ten Cate, Susan D. Healy, 2017-06-22 The cognitive abilities of birds are remarkable hummingbirds integrate spatial and temporal information about food sources day old chicks have a sense of numbers parrots can make and use tools and ravens have sophisticated insights in social relationships This volume describes the full range of avian cognitive abilities the mechanisms behind such abilities and how they relate to the ecology of the species Synthesising the latest research in avian cognition a range of experts in the field provide first hand insights into experimental procedures outcomes and theoretical advances including a discussion of how the findings in birds relate to the cognitive abilities of other species including humans The authors cover a range of topics such as spatial cognition social learning tool use perceptual categorization and concept learning providing the broader context for students and researchers interested in the current state of avian cognition research its key questions and appropriate experimental approaches

Thinking like a Parrot Alan B. Bond, Judy Diamond, 2019-07-02 From two experts on wild parrot cognition a close look at the intelligence social behavior and conservation of these widely threatened birds People form enduring emotional bonds with other animal species such as dogs

cats and horses For the most part these are domesticated animals with one notable exception many people form close and supportive relationships with parrots even though these amusing and curious birds remain thoroughly wild creatures What enables this unique group of animals to form social bonds with people and what does this mean for their survival In Thinking like a Parrot Alan B Bond and Judy Diamond look beyond much of the standard work on captive parrots to the mischievous inquisitive and astonishingly vocal parrots of the wild Focusing on the psychology and ecology of wild parrots Bond and Diamond document their distinctive social behavior sophisticated cognition and extraordinary vocal abilities Also included are short vignettes field notes on the natural history and behavior of both rare and widely distributed species from the neotropical crimson fronted parakeet to New Zealand's flightless ground dwelling kakapo This composite approach makes clear that the behavior of captive parrots is grounded in the birds wild ecology and evolution revealing that parrots ability to bond with people is an evolutionary accident a by product of the intense sociality and flexible behavior that characterize their lives Despite their adaptability and intelligence however nearly all large parrot species are rare threatened or endangered To successfully manage and restore these wild populations Bond and Diamond argue we must develop a fuller understanding of their biology and the complex set of ecological and behavioral traits that has led to their vulnerability Spanning the global distribution of parrot species Thinking like a Parrot is rich with surprising insights into parrot intelligence flexibility and even in the face of threats resilience

The Oxford Handbook of Human Symbolic Evolution Nathalie Gontier, Andy Lock, Chris Sinha, 2024-01-17 The biological and neurological capacity to symbolize and the products of behavioral cognitive sociocultural linguistic and technological uses of symbols symbolism are fundamental to every aspect of human life The Oxford Handbook of Human Symbolic Evolution explores the origins of our characteristically human abilities our ability to speak create images play music and read and write The book investigates how symbolization evolved in human evolution and how symbolism is expressed across the various areas of human life The field is intrinsically interdisciplinary considering findings from fossil studies scientific research from primatology developmental psychology and of course linguistics Written by world leading experts thirty eight topical chapters are grouped into six thematic parts that respectively focus on epistemological psychological anthropological ethological linguistic and social technological aspects of human symbolic evolution The handbook presents an in depth but comprehensive and interdisciplinary overview of the of the state of the art in the science of human symbolic evolution This work will be of interest to academics and students active in all fields contributing to the study of human evolution

Mahale Chimpanzees Michio Nakamura, Kazuhiko Hosaka, Noriko Itoh, Koichiro Zamma, 2015-09-10 A major contribution to great ape research covering every aspect of the Mahale Mountain Chimpanzee Project to offer new unique insights
