Architecture And The Sites Of History Interpretations Of Buildings And Cities:

Architecture and the Sites of History Iain Borden, David Dunster, 1996 Occupying Architecture Jonathan Hill, 2005-07-28 Occupying Architecture focuses on the importance of the user of architecture It emphasises the cross currents between design theory and use and the need for a wider cross cultural approach to architecture Beginning with the architect the book proceeds to explore models for architectural practice that actively engage the issue of use and concludes with examination of the user The authors draw on illustrations and examples from London Las Vegas Barcelona and Bruges to discuss how and why architecture ignores the user The apparant contradictions between the producer and the product of architecture are highlighted before the activities of the architect and the actions of the user are explored This book illustrates that architecture is not just a building it is the relation between an object and its occupant The Grove Encyclopedia of American Art Joan M. Marter, 2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries **Underground Spaces** C. A. Brebbia, D. Kaliampakos, 2008 It is a strongly held belief that population growth and the demand for better accommodation and leisure facilities combined with a desire to improve the landscape will result in the need to develop more underground spaces This phenomenon which started in countries subjected to extreme climates is now becoming more widespread Underground spaces are being utilized for a wide diversity of needs They range from classical excavations to subway constructions underground sports halls power stations waste repositories underground cities and many others Their construction techniques are also varied from open air excavations to newly developed injection methods The response of the underground structures on the imposed loadings depends on a number of parameters that sometimes are too complex or not fully understood resulting in budget overruns or even failures that lead to loss of property or life Such uncertain cases need to be addressed and engineers should be able to accurately predict the construction s performance throughout its construction and service life The First International Conference on Underground Spaces discusses not only structural and environmental material characterization aspects but also the trends regarding the utilization of underground spaces This book contains papers presented at the Meeting and covers a wide range of topics including Use of underground space for industry Underground power stations Toxic and nuclear waste repositories Energy underground reservoirs Underground sewerage plants Waste storage and management Road and railway tunnels Utility tunnels Fire defence Defence against terrorist attacks *Critical Built Heritage Practice and Conservation* Johnathan Djabarouti, 2024-01-23 Critical Built Heritage Practice and Conservation Evolving Perspectives supports an alternative point of departure for engaging with the historic built environment by critically questioning the legitimacy of dominant conservation concepts and methods that are often taken for granted within building conservation architecture and adaptive reuse The meaning of heritage is changing From pastness to presentness from preservation to participation and from tangible to intangible heritage is increasingly understood as a dynamic social and intangible process

across many disciplines Consequently the role and remit of the built heritage practitioner and in particular the architectural conservationist is becoming progressively complex and in need of a critical gaze Is restoration really a falsehood from beginning to end Should the condition of existing materials determine the conservation method Is authenticity really an inherent quality within old buildings By engaging with a critical interpretation of heritage this book makes space for practitioners to consider the evolution of their own role within a rapidly changing context of built heritage practice Reinforced by a shift in emphasis from materials to meanings a socio material outlook is proposed which champions an enhanced focus on intangible heritage within the built heritage sector whilst still acknowledging the physical condition of old buildings is a priority for many stakeholders This book has been written with practitioners students and educators of architectural conservation in mind although will also be of relevance to the broader built heritage industry as well as academics researchers and heritage students with a passion for contemporary dialogues in heritage studies

Making the Invisible Visible Leonie Sandercock, 2023-04-28 The history of planning is much more according to these authors than the recorded progress of planning as a discipline and a profession These essays counter the mainstream narrative of rational scientific development with alternative histories that reveal hitherto invisible planning practices and agendas While the official story of planning celebrates the state and its traditions of city building and regional development these stories focus on previously unacknowledged actors and the noir side of planning Through a variety of critical lenses feminist postmodern and postcolonial the essays examine a broad range of histories relevant to the preservation and planning professions Some contributors uncover indigenous planning traditions that have been erased from the record African American and Native American traditions for example Other contributors explore new themes themes of gendered spaces and racist practices of planning as an ordering tool a kind of spatial police of bodies cities and social order influenced by Foucault Lefebvre and others and of resistance This scrutiny of the class race gender ethnic or ideological biases of ideas and practices inherent in the notion of planning as a modernist social technology clearly points to the inadequacy of modernist planning histories Making the Invisible Visible redefines planning as the regulation of the physicality sociality and spatiality of the city Its histories provide the foundation of a new alternative planning paradigm for the multicultural cities of the future The history of planning is much more according to these authors than the recorded progress of planning as a discipline and a profession These essays counter the mainstream narrative of rational scientific development with alternative histories that re

Becoming Modern in Toronto Keith Walden, 1997-01-01 In Becoming Modern in Toronto Keith Walden shows how the

Toronto Industrial Exhibition from its founding in 1879 to 1903 when it was renamed the Canadian National Exhibition influenced the shaping and ordering of the emerging urban culture Seizing Jerusalem Alona Nitzan-Shiftan, 2017-05-30

After seizing Jerusalem's eastern precincts from Jordan at the conclusion of the Six Day War in 1967 Israel unilaterally unified the city and plunged into an ambitious building program eager to transform the very meaning of one of the world's most emotionally charged urban spaces The goal was as simple as it was controversial to both Judaize and modernize Jerusalem Seizing Jerusalem chronicles how numerous disciplines including architecture landscape design and urban planning as well as everyone from municipal politicians to state bureaucrats from Israeli born architects to international luminaries such as Louis Kahn Buckminster Fuller and Bruno Zevi competed to create Jerusalem's new image This decade long competition happened with the Palestinian residents still living in the city even as the new image was inspired by the city's Arab legacy The politics of space in the Holy City still contested today were shaped in this post 1967 decade not only by the legacy of the war and the politics of dispossession but curiously also by emerging trends in postwar architectural culture Drawing on previously unexamined archival documents and in depth interviews with architects planners and politicians Alona Nitzan Shiftan analyzes the cultural politics of the Israeli state and in particular of Jerusalem's influential mayor Teddy Kollek whose efforts to legitimate Israeli rule over Jerusalem provided architects a unique real world laboratory to explore the possibilities and limits of modernist design as built form as well as political and social action Seizing Jerusalem reveals architecture as an active agent in the formation of urban and national identity and demonstrates how contemporary debates about Zionism and the crisis within the discipline of architecture over postwar modernism affected Jerusalem's built environment in ways that continue to resonate today **The Versailles Effect** Mark Ledbury, Robert Wellington, 2020-12-10

The essays in this volume show that Versailles was not the static creation of one man but a hugely complex cultural space a centre of power but also of life love anxiety creation and an enduring palimpsest of aspirations desires and ruptures The splendour of the Chateau and the masterpieces of art and design that it contains mask a more complex and sometimes more sordid history of human struggle and achievement The case studies presented by the contributors to this book cannot provide a comprehensive account of the Palace of Versailles and its domains the life within its walls its visitors and the art and architecture that it has inspired from the seventeenth century to the present day from the palace of the Sun King to the Penthouse of Donald Trump However this innovative collection will reshape or even radically redefine our understanding of the palace of Versailles and its posterity
