Architecture and the Body, Science and Culture Kim Sexton, 2017-10-20 The relationship of architecture to the human body is a centuries long and complex one but not always symmetrical This book opens a space for historians of the visual arts archaeologists architects and digital humanities professionals to reflect upon embodiment spatiality science and architecture in premodern and modern cultural contexts Architecture and the Body Science and Culture poses one overarching question How does a period s understanding of bodies as objects of science impinge upon architectural thought and design The answers are sophisticated interdisciplinary explorations of theory technology symbolism medicine violence psychology deformity and salvation and they have unexpected and fascinating implications for architectural design and history The new research published in this volume reinvigorates the Western survey style trajectory from Archaic Greece to post war Europe with scientifically framed body centred provocations By adding the third factor science to the architecture and body equation this book presents a nuanced appreciation for architectural creativity and its embeddedness in other sets of social institutional and political relationships In so doing it spatializes body theory and ties it to the experience of the built environment in ways that disturb traditional boundaries between the architectural container and the corporeally contained

The biopolitics of the war on terror Julian Reid, 2013-07-19 Newly available in paperback this book overturns existing understandings of the origins and futures of the War on Terror for the purposes of International Relations theory It demonstrates why this is not a war in defence of the integrity of human life but a war over the political constitution of life in which the limitations of liberal accounts of humanity are a fundamental cause of the conflict The question of the future of humanity is posed by this war but only in the sense that its resolution depends on our abilities to move beyond the limits of dominant understandings of the human and its politics Theorising with and beyond the works of Foucault Deleuze Baudrillard Virilio and Negri this book examines the possibilities for such a movement What forms does human life take it asks when liberal understandings of humanity are no longer understood as horizons to strive for but impositions against which the human must struggle in order to fulfil its destiny What forms does the human assume when war against liberal regimes becomes the determining condition of its possibility Answers to such questions are pressing this book argues if we earnestly
