Bitext Alignment Synthesis Lectures On Human Language Technologies:

Bitext Alignment Jörg Tiedemann, 2022-05-31 This book provides an overview of various techniques for the alignment of bitexts. It describes general concepts and strategies that can be applied to map corresponding parts in parallel documents on various levels of granularity. Bitexts are valuable linguistic resources for many different research fields and practical applications. The most predominant application is machine translation in particular statistical machine translation. However, there are various other threads that can be followed which may be supported by the rich linguistic knowledge implicitly stored in parallel resources. Bitexts have been explored in lexicography, word sense disambiguation, terminology extraction, computer aided language learning and translation studies to name just a few. The book covers the essential tasks that have to be carried out when building parallel corpora starting from the collection of translated documents up to sub-sentential alignments. In particular, it describes various approaches to document alignment, sentence alignment, word alignment and tree structure alignment. It also includes a list of resources and a comprehensive review of the literature on alignment techniques. Table of Contents: Introduction, Basic Concepts and Terminology, Building Parallel Corpora, Sentence Alignment, Word Alignment, Phrase and Tree Alignment, Concluding Remarks.

Bitext Alignment Jörg Tiedemann, 2011 This book provides an overview of various techniques for the alignment of bitexts. It describes general concepts and strategies that can be applied to map corresponding parts in parallel documents on various levels of granularity. Bitexts are valuable linguistic resources for many different research fields and practical applications. The most predominant application is machine translation in particular statistical machine translation. However, there are various other threads that can be followed which may be supported by the rich linguistic knowledge implicitly stored in parallel resources. Bitexts have been explored in lexicography, word sense disambiguation, terminology extraction, computer aided language learning and translation studies to name just a few. The book covers the essential tasks that have to be carried out when building parallel corpora starting from the collection of translated documents up to sub-sentential alignments. In particular, it describes various approaches to document alignment, sentence alignment, word alignment and tree structure alignment. It also includes a list of resources and a comprehensive review of the literature on alignment techniques. Language, Logic, and Computation Aybüke Özgün, Yulia Zinova, 2022-03-30 This book constitutes the refereed proceedings of the 13th International Tbilisi Symposium on Logic, Language and Computation (TbiLLC 2019) held in Batumi, Georgia, in September 2019. The volume contains 17 full revised papers presented at the conference from 17 submissions. The scientific program consisted of tutorials, invited lectures, contributed talks and two workshops. The symposium offered two tutorials in language and logic and aimed at students as well as researchers working in the other areas. Language Sign language linguistics: State of the art by Fabian Bross, University of Stuttgart, Germany; Logic: Axiomatic Semantics by Graham

E Leigh University of Gothenburg Sweden **Information Retrieval Technology** Mohamed Vall Mohamed Salem, Khaled Shaalan, Farhad Oroumchian, Azadeh Shakery, Halim Khelalfa, 2011-12-14 This book constitutes the refereed proceedings of the 7th Asia Information Retrieval Societies Conference AIRS 2011 held in Dubai United Arab Emirates in December 2011 The 31 revised full papers and 25 revised poster papers presented were carefully reviewed and selected from 132 submissions All current aspects of information retrieval in theory and practice are addressed the papers are organized in topical sections on information retrieval models and theories information retrieval applications and multimedia information retrieval user study information retrieval evaluation and interactive information retrieval Web information retrieval scalability and adversarial information retrieval machine learning for information retrieval natural language processing for information retrieval arabic script text processing and retrieval **Textual Information Access** Eric Gaussier, Francois Yvon, 2013-02-04 This book presents statistical models that have recently been developed within several research communities to access information contained in text collections The problems considered are linked to applications aiming at facilitating information access information extraction and retrieval text classification and clustering opinion mining comprehension aids automatic summarization machine translation visualization In order to give the reader as complete a description as possible the focus is placed on the probability models used in the applications concerned by highlighting the relationship between models and applications and by illustrating the behavior of each model on real collections Textual Information Access is organized around four themes informational retrieval and ranking models classification and clustering regression logistics kernel methods Markov fields etc multilingualism and machine translation and emerging applications such as information exploration *Language, Cognition, and Computational Models* Thierry Poibeau, Aline Villavicencio, 2018-01-25 This book uses recent computational models to explore issues related to language and cognition

The Routledge Handbook of Translation and Technology Minako O'Hagan, 2019-08-23 The Routledge Handbook of Translation and Technology provides a comprehensive and accessible overview of the dynamically evolving relationship between translation and technology Divided into five parts with an editor's introduction this volume presents the perspectives of users of translation technologies and of researchers concerned with issues arising from the increasing interdependency between translation and technology The chapters in this Handbook tackle the advent of technologization at both a technical and a philosophical level based on industry practice and academic research Containing over 30 authoritative cutting edge chapters this is an essential reference and resource for those studying and researching translation and technology The volume will also be valuable for translators computational linguists and developers of translation tools

Multiword Units in Machine Translation and Translation Technology Ruslan Mitkov, Johanna Monti, Gloria Corpas Pastor, Violeta Seretan, 2018-07-15 The correct interpretation of Multiword Units MWUs is crucial to many applications in Natural Language Processing but is a challenging and complex task In recent years the computational treatment of MWUs

has received considerable attention but there is much more to be done before we can claim that NLP and Machine Translation MT systems process MWUs successfully This volume provides a general overview of the field with particular reference to Machine Translation and Translation Technology and focuses on languages such as English Basque French Romanian German Dutch and Croatian among others The chapters of the volume illustrate a variety of topics that address this challenge such as the use of rule based approaches compound splitting techniques MWU identification methodologies in multilingual applications and MWU alignment issues

Human-Computer Interaction - INTERACT 2015 Julio Abascal, Simone Barbosa, Mirko Fetter, Tom Gross, Philippe Palanque, Marco Winckler, 2015-08-31 The four volume set LNCS 9296 9299 constitutes the refereed proceedings of the 15th IFIP TC13 International Conference on Human Computer Interaction INTERACT 2015 held in Bamberg Germany in September 2015 The 41 papers included in the first volume are organized in topical sections on accessibility accessible interfaces for blind people accessible interfaces for older adults affective HCI and emotions and motivational aspects alternative input alternative input devices for people with disabilities interfaces for cognitive support brain computer interaction cognitive factors

Natural Language Processing for Historical Texts Michael Piotrowski, 2022-05-31 More and more historical texts are becoming available in digital form Digitization of paper documents is motivated by the aim of preserving cultural heritage and making it more accessible both to laypeople and scholars As digital images cannot be searched for text digitization projects increasingly strive to create digital text which can be searched and otherwise automatically processed in addition to facsimiles Indeed the emerging field of digital humanities heavily relies on the availability of digital text for its studies Together with the increasing availability of historical texts in digital form there is a growing interest in applying natural language processing NLP methods and tools to historical texts However the specific linguistic properties of historical texts the lack of standardized orthography in particular pose special challenges for NLP This book aims to give an introduction to NLP for historical texts and an overview of the state of the art in this field The book starts with an overview of methods for the acquisition of historical texts scanning and OCR discusses text encoding and annotation schemes and presents examples of corpora of historical texts in a variety of languages The book then discusses specific methods such as creating part of speech taggers for historical languages or handling spelling variation A final chapter analyzes the relationship between NLP and the digital humanities Certain recently emerging textual genres such as SMS social media and chat messages or newsgroup and forum postings share a number of properties with historical texts for example nonstandard orthography and grammar and profuse use of abbreviations The methods and techniques required for the effective processing of historical texts are thus also of interest for research in other domains

Table of Contents Introduction NLP and Digital Humanities Spelling in Historical Texts Acquiring Historical Texts Text Encoding and Annotation Schemes Handling Spelling Variation NLP Tools for Historical Languages Historical Corpora Conclusion Bibliography
